

1. Record Nr.	UNINA9910299247003321
Autore	Chen Yanjiao
Titolo	Dynamic Spectrum Auction in Wireless Communication // by Yanjiao Chen, Qian Zhang
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2015
ISBN	3-319-14030-2
Edizione	[1st ed. 2015.]
Descrizione fisica	1 online resource (64 p.)
Collana	SpringerBriefs in Electrical and Computer Engineering, , 2191-8112
Disciplina	004.6 620 621.382
Soggetti	Electrical engineering Computer communication systems Communications Engineering, Networks Computer Communication Networks
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Introduction -- Static Homogeneous Spectrum Auction -- Static Heterogeneous Spectrum Auction -- Dynamic Spectrum Auction -- Future Research Directions.
Sommario/riassunto	This brief explores current research on dynamic spectrum auctions, focusing on fundamental auction theory, characteristics of the spectrum market, spectrum auction architecture and possible auction mechanisms. The brief explains how dynamic spectrum auctions, which enable new users to gain spectrum access and existing spectrum owners to obtain financial benefits, can greatly improve spectrum efficiency by resolving the artificial spectrum shortage. It examines why operators and users face significant challenges due to specialty of the spectrum market and the related requirements imposed on the auction mechanism design. Concise and up-to-date, Dynamic Spectrum Auction in Wireless Communication is designed for researchers and professionals in computer science or electrical engineering. Students studying networking will also find this brief a valuable resource.
