

1. Record Nr.	UNINA9910299288403321
Titolo	Distributed Computer and Communication Networks : 21st International Conference, DCCN 2018, Moscow, Russia, September 17–21, 2018, Proceedings // edited by Vladimir M. Vishnevskiy, Dmitry V. Kozyrev
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2018
ISBN	3-319-99447-6
Edizione	[1st ed. 2018.]
Descrizione fisica	1 online resource (XV, 586 p. 185 illus.)
Collana	Communications in Computer and Information Science, , 1865-0929 ; ; 919
Disciplina	004.36
Soggetti	Computer communication systems Computer science—Mathematics Application software Computer Communication Networks Mathematics of Computing Information Systems Applications (incl. Internet)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Computer and communication networks architecture optimization -- Control in computer and communication networks -- Performance and QoS/QoE evaluation in wireless networks -- Analytical modeling and simulation of next-generation communications systems -- Queuing theory and reliability theory applications in computer networks -- Wireless 4G/5G networks, cm- and mm-wave radio technologies -- RFID technology and its application in intellectual transportation networks -- Internet of things, wearables, and applications of distributed information systems -- Probabilistic and statistical models in information systems -- Mathematical modeling of high-tech systems -- Mathematical modeling and control problems -- Distributed and cloud computing systems, big data analytics.
Sommario/riassunto	This book constitutes the refereed proceedings of the 21th International Conference on Distributed and Computer and

Communication Networks, DCCN 2018, held in Moscow, Russia, in September 2018. The 50 full papers and the 9 short papers were carefully reviewed and selected from 168 submissions. The papers cover the following topics: computer and communication networks architecture optimization; control in computer and communication networks; performance and QoS/QoE evaluation in wireless networks; analytical modeling and simulation of next-generation communications systems; queueing theory and reliability theory applications in computer networks; wireless 4G/5G networks, cm- and mm-wave radio technologies; RFID technology and its application in intellectual transportation networks; Internet of Things, wearables, and applications of distributed information systems; probabilistic and statistical models in information systems; mathematical modeling of high-tech systems; mathematical modeling and control problems; distributed and cloud computing systems, big data analytics.
