

1. Record Nr.	UNINA9910299308903321
Titolo	Model-Driven Engineering and Software Development : 5th International Conference, MODELSWARD 2017, Porto, Portugal, February 19-21, 2017, Revised Selected Papers // edited by Luís Ferreira Pires, Slimane Hammoudi, Bran Selic
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2018
ISBN	3-319-94764-8
Edizione	[1st ed. 2018.]
Descrizione fisica	1 online resource (XII, 507 p. 181 illus.)
Collana	Communications in Computer and Information Science, , 1865-0937 ; ; 880
Disciplina	005.1
Soggetti	Software engineering Operating systems (Computers) Compilers (Computer programs) Logic design Electronic digital computers - Evaluation Computer systems Software Engineering Operating Systems Compilers and Interpreters Logic Design System Performance and Evaluation Computer System Implementation
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Sommelier: A Tool for Validating TOSCA Application TopologiesSommelier: A Tool for Validating TOSCA Application Topologies -- Evaluation of XIS-Reverse, a Model-Driven Reverse Engineering Approach for Legacy Information Systems -- Formal and Virtual Multi-level Design Space Exploration -- Automated Synthesis of a Real-time Scheduling for Cyber-physical Multi-core Systems -- A Model based Approach for Complex Dynamic Decision-making -- Deterministic High-level Executable Models Allowing Efficient Runtime

Verification -- A Consistency-preserving Editing Model for Dynamic
Filtered Engineering of Model-driven Product Lines -- Model-driven
STEP Application Protocol Extensions Combined with Feature Modeling
Considering Geometrical Information -- A Model Driven Engineering
Approach for Heterogeneous Model Composition -- Generative versus
Interpretive Model-Driven Development: Moving Past 'It Depends' --
Applying Integrated Domain-Specific Modeling for Multi-concerns
Development of Complex Systems.-A Domain-Specific Modeling
Approach for Testing Environment Emulation -- A Framework for UML-
based Component-based Design and Code Generation for Reactive
Systems -- Automatic UI Generation for Aggregated Linked Data
Applications by using Sharable Application Ontologies -- Surveying Co-
Evolution in Modeling Ecosystems -- Functional Decomposition for
Software Architecture Evolution -- Model-Driven Approach to Handle
Evolutions of OLAP Requirements and Data Source Model -- Complex
Event Processing for User-Centric Management of IoT Systems --
Efficient Distributed Execution of Multi-component Scenario-Based
Models -- Modelling the World of a Smart Room for Robotic Co-
working.

Sommario/riassunto

This book constitutes thoroughly revised and selected papers from the 5th International Conference on Model-Driven Engineering and Software Development, MODELSWARD 2017, held in Porto, Portugal, in February 2017. The 20 thoroughly revised and extended papers presented in this volume were carefully reviewed and selected from 91 submissions. They contribute to the development of highly relevant research trends in model-driven engineering and software development such as methodologies for MDD development and exploitation, model-based testing, model simulation, domain-specific modeling, code generation from models, new MDD tools, multi-model management, model evolution, and industrial applications of model-based methods and technologies.
