

1. Record Nr.	UNINA9910299316203321
Titolo	Communications and Networking : 11th EAI international Conference, ChinaCom 2016 Chongqing, China, September 24-26, 2016, Proceedings, Part II // edited by Qianbin Chen, Weixiao Meng, Liqiang Zhao
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2018
ISBN	9783319666280 3319666282
Edizione	[1st ed. 2018.]
Descrizione fisica	1 online resource (XXI, 600 p. 313 illus.)
Collana	Lecture Notes of the Institute for Computer Sciences, Social Informatics and Telecommunications Engineering, , 1867-8211 ; ; 210
Disciplina	004.6
Soggetti	Computer communication systems Special purpose computers Computer simulation Data protection Computer system failures Computer Communication Networks Special Purpose and Application-Based Systems Simulation and Modeling Security System Performance and Evaluation
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Preface -- Organization -- Contents -- Part II -- Contents -- Part I -- Energy Harvesting Systems -- Energy-Efficient Resource Allocation in Energy Harvesting Communication Systems: A Heuristic Algorithm -- 1 Introduction -- 2 System Model and Problem Formulation -- 3 Suboptimal Solution to Resource Allocation Optimization Problem -- 4 Simulation Results and Analysis -- 5 Conclusion -- References -- Relay Selection Scheme for Energy Harvesting Cooperative Networks -- 1 Introduction -- 2 System Model -- 3 Relay Selection Schemes -- 4 Performance Analysis -- 5 Numerical

Results -- 6 Conclusion -- References -- Dynamic Power Control for Throughput Maximization in Hybrid Energy Harvesting Node -- Abstract -- 1 Introduction -- 2 System Model and Problem Formulation -- 3 Solution of the Optimization Problem -- 3.1 The Dynamic Algorithm -- 3.2 Analysis of Complexity of the Proposed Algorithm -- 4 Simulation Results -- 5 Conclusion -- Acknowledgment -- References -- Power Allocation Algorithm for Heterogeneous Cellular Networks Based on Energy Harvesting -- 1 Introduction -- 2 System Model -- 3 Power Allocation Algorithm -- 4 Simulation Results and Discussion -- 5 Conclusions -- References -- Price-Based Power Allocation in Energy Harvesting Wireless Cooperative Networks: A Stackelberg Game Approach -- 1 Introduction -- 2 System Model and Problem Formulation -- 3 Optimal Price-Based Power Allocation Algorithm -- 4 Simulation Results -- 5 Conclusions -- References -- Resource Allocation Schemes (1) -- Coverage and Capacity Optimization Based on Tabu Search in Ultra-Dense Network -- 1 Introduction -- 2 System Model -- 3 Optimization Schemes Based on Tabu Search -- 4 Simulation Results -- 4.1 Scenario -- 4.2 Analysis -- 5 Conclusions -- References -- Dynamic APs Grouping Scheme Base on Energy Efficiency in UUDN -- Abstract -- 1 Introduction. 2 System Model -- 2.1 UUDN System Architecture -- 2.2 Channel Model -- 3 Dynamic APs Grouping Scheme -- 4 Problem Formulation and Optimal Solution -- 4.1 Problem Formulation -- 4.2 Optimal Solution -- 5 Simulation Results and Discussions -- 6 Conclusions -- Acknowledgements -- References -- Virtual Small Cell Selection Schemes Based on Sum Rate Analysis in Ultra-Dense Network -- Abstract -- 1 Introduction -- 2 System Model -- 3 Ergodic Sum Rate Analysis -- 4 Analysis on VSC Selection Schemes -- 4.1 VSC Selection Scheme Based on Minimum Distance -- 4.2 VSC Selection Scheme Based on Pattern Search -- 5 Simulation Results and Analysis -- 6 Conclusions -- Acknowledgments -- References -- System Level Performance Evaluation for Ultra-Dense Networks -- Abstract -- 1 Introduction -- 2 System Model -- 2.1 Scenario and Parameter -- 2.2 Channel Model -- 2.3 Antenna Model -- 2.4 Protocol Stack -- 3 Simulation Evaluation -- 3.1 SINR -- 3.2 Throughput -- 3.3 Spectrum Efficiency -- 3.4 Energy Efficiency -- 4 Challenges in Ultra Dense Networks -- 5 Conclusions -- Acknowledgments -- References -- Green Distributed Power Control Algorithm for Multi-user Cognitive Radio Networks -- 1 Introduction -- 2 System Model and Problem Formulation -- 3 Review of NPG and Stackelberg Game -- 3.1 NPG Algorithm and NE -- 3.2 The Single-Leader Stackelberg Game for Power Control -- 4 Distributed Multi-leader Stackelberg Power Control Game -- 4.1 The Criterion of Choosing Leader in DMSPG Algorithm -- 4.2 The Proposed DMSPG Algorithm -- 4.3 Analysis of Multi-leader Game and Continuous Pareto Improvements in DMSPG -- 5 Numerical Results -- 6 Conclusion -- References -- Optimal Channel Selection and Power Control over D2D Communications Based Cognitive Radio Networks -- 1 Introduction -- 2 The System Model -- 2.1 Network Model -- 2.2 Channel Model -- 2.3 Virtual Queue Model. 2.4 Video Distortion Model -- 3 Video Distortion Minimization -- 3.1 Problem Formulation -- 3.2 Lagrange-Dual Method -- 4 Numerical Results -- 5 Conclusion -- References -- Network Architecture and SDN -- Research on Load Balancing for Software Defined Cloud-Fog Network in Real-Time Mobile Face Recognition -- Abstract -- 1 Introduction -- 2 SDC-FN Architecture -- 3 FWA-Based Load Balancing Algorithm in SDC-FN -- 3.1 Theoretical Model -- 3.2 SDN-Based FWA Algorithm -- 4 Simulation Results -- 4.1 Latency Performance Comparison Between the Cloud-Based Architecture and SDC-FN -- 4.2

Latency Performance Comparison of Multiple Load Balancing Algorithms -- 4.3 Influence of the Uplink Bandwidth for the Latency of SDC-FN -- 5 Conclusions -- Acknowledgments -- References -- Applying TOPSIS Method for Software Defined Networking (SDN) Controllers Comparison and Selection -- Abstract -- 1 Introduction -- 2 SDN Controllers Investigation -- 2.1 Methodology for the Investigation -- 2.2 SDN Controllers Overview -- 3 The Decision Making Method -- 3.1 The Concept of TOPSIS Method -- 3.2 Determination of Criteria Weights -- 3.3 Selecting the Best Alternative -- 4 The Best SDN Controller Selection (Experimental Results) -- 5 Conclusion and Future Work -- References -- Robust Congestion Control in NFVs and WSDNs with Propagation Delay and External Interference -- 1 Introduction -- 2 Model and Analysis -- 3 Problem Formulations of Robust H Control -- 4 Criteria of Robust H Control -- 5 Simulation Results -- 5.1 Effectiveness Verification of the Proposed Scheme -- 5.2 Design of Control Policy on Robust H Control -- 6 Conclusion -- References -- Latency-Aware Reliable Controller Placements in SDNs -- 1 Introduction -- 2 Problem Formulation -- 3 Algorithm for Controller Placements -- 3.1 The Construction of the Auxiliary Graph -- 3.2 Controller Placement. 4 Performance Evaluation -- 4.1 Simulation Setup -- 4.2 Performance Evaluation of the Proposed Algorithm -- 5 Conclusions -- References -- Signal Detection and Estimation (2) -- Multiantenna Based Blind Spectrum Sensing via Nonparametric Test -- 1 Introduction -- 2 System Model -- 2.1 Signal Model -- 2.2 Previous Works -- 3 Nonparametric Test Based Detection -- 3.1 Binomial Distribution Based Detection -- 3.2 Wilcoxon Signed Rank Test Based Detection -- 4 Implementation and Complexity Comparison -- 5 Simulation Results -- 6 Conclusion -- References -- Blind Spectrum Sensing in Cognitive Radio Using Right Anderson Darling Test -- 1 Introduction -- 2 System Model -- 3 Spectrum Sensing as Goodness of Fit Testing -- 4 Right-Anderson Darling Sensing -- 5 Simulation Results -- 6 Conclusion -- References -- A Computationally Efficient 2-D DOA Estimation Approach for Non-uniform Co-prime Arrays -- 1 Introduction -- 2 System Model -- 3 MUSIC Spectrum and Proposed Method -- 3.1 MUSIC Spectrum -- 3.2 Joint Spectrum and Proposed Method -- 4 Numerical Results -- 5 Conclusion -- References -- Low-Complexity MMSE Signal Detection Based on WSSOR Method for Massive MIMO Systems -- 1 Introduction -- 2 Massive MIMO System Model -- 3 Near-Optimal Massive MIMO Signal Detector with Low Complexity -- 3.1 Signal Detection Based on WSSOR Method -- 3.2 Proper Relaxation and Parameter and Initial Solution -- 3.3 Computational Complexity Analysis -- 4 Simulation Result -- 5 Conclusion -- References -- Channel Characteristics and User QoS-Aware Handoff Target Spectrum Selection in Cognitive Radio Networks -- 1 Introduction -- 2 System Model -- 3 Interruption Delay Constraint and Transmission Time Constraint Formulation -- 3.1 Interruption Delay Constraint -- 3.2 Remaining Transmission Time Examination -- 4 Proposed Handoff Spectrum Selection Scheme. 4.1 Staying on Current Channel -- 4.2 Interruption Delay Constraint Based Spectrum Selection -- 4.3 Transmission Time Constraint Based Spectrum Selection -- 5 Simulation Results -- 6 Conclusions -- References -- Heterogeneous Networks -- A Tractable Traffic-Aware User Association Scheme in Heterogeneous Networks -- 1 Introduction -- 2 System Model -- 2.1 Traffic-Aware User Association Scheme -- 2.2 SINR Model -- 3 System Performance Analysis -- 3.1 SINR Coverage -- 3.2 Rate Coverage -- 3.3 DL Throughput -- 4 Numerical Results -- 5 Conclusion -- References -- An Optimal Joint User Association and

Power Allocation Algorithm for Secrecy Information Transmission in Heterogeneous Integrated Networks -- 1 Introduction -- 2 System Model -- 3 Secrecy Energy Efficiency Optimization Problem Formulation -- 4 Solution of the Optimization Problem -- 4.1 Optimal Power Allocation Subproblem -- 4.2 User Association Subproblem -- 5 Simulation Results -- 6 Conclusion -- References -- Energy-Efficient Femtocells Active/Idle Control and Load Balancing in Heterogeneous Networks -- 1 Introduction -- 2 System Model -- 3 LB and FBSs Active/Idle Switch Strategies Algorithm -- 3.1 Load Balancing Design Under Fixed FBSs Active/Idle Strategies -- 3.2 FBSs Active/Idle Switch Strategies Control -- 4 Simulation Results -- 5 Conclusion -- References -- Energy Efficiency of Heterogeneous Air-Ground Cellular Networks -- Abstract -- 1 Introduction -- 2 System Model -- 2.1 Hierarchy Architecture -- 2.2 System Energy Efficiency -- 3 EE Analysis for Heterogeneous Networks -- 3.1 Interference Analysis and EE Formulation -- 3.2 Proof of Existence of the Optimal Solution -- 4 Simulation Results -- 5 Conclusion -- Acknowledgements -- References -- Capacity Analysis in the Cognitive Heterogeneous Cellular Networks with Stochastic Methods -- Abstract -- 1 Introduction -- 2 System Model. 3 Capacity Derivation of Cognitive Heterogeneous Networks.

---

Sommario/riassunto

The two-volume set LNICST 209-210 constitutes the post-conference proceedings of the 11th EAI International Conference on Communications and Networking, ChinaCom 2016, held in Chongqing, China, in September 2016. The total of 107 contributions presented in these volumes are carefully reviewed and selected from 181 submissions. The book is organized in topical sections on MAC schemes, traffic algorithms and routing algorithms, security, coding schemes, relay systems, optical systems and networks, signal detection and estimation, energy harvesting systems, resource allocation schemes, network architecture and SDM, heterogeneous networks, IoT (Internet of Things), hardware design and implementation, mobility management, SDN and clouds, navigation, tracking and localization, future mobile networks.
