

1. Record Nr.	UNINA990001862220403321
Autore	Bonomi, Alberto
Titolo	La digeribilità in vitro della frazione proteica della farina di penne di pollo : risultati ottenuti a seguito di prove effettuate su farina integrale e su farina opportunamente idrolisata / Alberto Bonomi, Enzo Bianchi, Giovanni Wiesner
Pubbl/distr/stampa	Bologna : [s.n.], 1963
Descrizione fisica	9 p. ; 24 cm
Collana	Raccolta di memorie / Università degli studi di Torino. Facoltà di scienze agrarie ; 316
Altri autori (Persone)	Bianchi, Enzo Wiesner, Giovanni
Disciplina	636.5
Locazione	FAGBC
Collocazione	60 MISC. B 131/316
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Estr. da: Quaderni della sperimentazione avicola italiana, n. 50.

2. Record Nr.	UNINA9910299386703321
Autore	Bibri Simon Elias
Titolo	Smart Sustainable Cities of the Future : The Untapped Potential of Big Data Analytics and Context-Aware Computing for Advancing Sustainability // by Simon Elias Bibri
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2018
ISBN	3-319-73981-6
Edizione	[1st ed. 2018.]
Descrizione fisica	1 online resource (685 pages)
Collana	The Urban Book Series, , 2365-757X
Disciplina	307.1216
Soggetti	Regional planning City planning Big data Sustainable development Landscape/Regional and Urban Planning Big Data Sustainable Development
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Introduction: The Rise of Sustainability, ICT, and Urbanization and the Materialization of Smart Sustainable Cities -- Conceptual, Theoretical, and Discursive Background: A Multidimensional Framework -- Big Data Analytics and Context-Aware Computing: Core Enabling Technologies, Techniques, Processes, and Systems -- Data Science for Urban Sustainability: Data Mining and Data-Analytic Thinking in the Next Wave of Urban Analytics -- Unprecedented Innovations in Sustainable Urban Planning: Novel Analytical Solutions and Data-Driven Decision-Making -- Systems Thinking and Complexity Science and the Relevance of Big Data Analytics, Intelligence Functions, and Simulation Models.
Sommario/riassunto	This book is intended to help explore the field of smart sustainable cities in its complexity, heterogeneity, and breadth, the many faces of a topical subject of major importance for the future that encompasses so much of modern urban life in an increasingly computerized and urbanized world. Indeed, sustainable urban development is currently at

the center of debate in light of several ICT visions becoming achievable and deployable computing paradigms, and shaping the way cities will evolve in the future and thus tackle complex challenges. This book integrates computer science, data science, complexity science, sustainability science, system thinking, and urban planning and design. As such, it contains innovative computer-based and data-analytic research on smart sustainable cities as complex and dynamic systems. It provides applied theoretical contributions fostering a better understanding of such systems and the synergistic relationships between the underlying physical and informational landscapes. It offers contributions pertaining to the ongoing development of computer-based and data science technologies for the processing, analysis, management, modeling, and simulation of big and context data and the associated applicability to urban systems that will advance different aspects of sustainability. This book seeks to explicitly bring together the smart city and sustainable city endeavors, and to focus on big data analytics and context-aware computing specifically. In doing so, it amalgamates the design concepts and planning principles of sustainable urban forms with the novel applications of ICT of ubiquitous computing to primarily advance sustainability. Its strength lies in combining big data and context-aware technologies and their novel applications for the sheer purpose of harnessing and leveraging the disruptive and synergetic effects of ICT on forms of city planning that are required for future forms of sustainable development. This is because the effects of such technologies reinforce one another as to their efforts for transforming urban life in a sustainable way by integrating data-centric and context-aware solutions for enhancing urban systems and facilitating coordination among urban domains. This timely and comprehensive book is aimed at a wide audience across science, academia industry, and policymaking. It provides the necessary material to inform relevant research communities of the state-of-the-art research and the latest development in the area of smart sustainable urban development, as well as a valuable reference for planners, designers, strategists, and ICT experts who are working towards the development and implementation of smart sustainable cities based on big data analytics and context-aware computing.
