

1.	Record Nr.	UNISALENTO991001053989707536
	Autore	Landau, Lev Davidovic
	Titolo	Lev D. Landau : his life and work / F. Janouch
	Pubbl/distr/stampa	Geneva : CERN, 1979
	Descrizione fisica	21 p. : ill. ; 30 cm.
	Classificazione	53(092)
	Altri autori (Persone)	Janouch, F.author
	Soggetti	Landau, Lev Davidovich
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
2.	Record Nr.	UNINA9910299404103321
	Autore	Jin Xiaobin
	Titolo	Historical Farmland in China During 1661-1980 : Reconstruction and Spatiotemporal Characteristics / / by Xiaobin Jin, Yinkang Zhou, Xuhong Yang, Yinong Cheng
	Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2018
	ISBN	3-319-71879-7
	Edizione	[1st ed. 2018.]
	Descrizione fisica	1 online resource (XI, 138 p. 60 illus., 49 illus. in color.)
	Collana	Historical Geography and Geosciences, , 2520-1379
	Disciplina	910
	Soggetti	Historical geography China—History Regional planning City planning Human geography Natural resources Agriculture Historical Geography History of China Landscape/Regional and Urban Planning Human Geography Natural Resources

Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references at the end of each chapters.
Sommario/riassunto	<p>This book explores various approaches to reconstruct the spatial and temporal distribution of historical farmland in China. The book contains background information about political regimes, economic and social development, population changes and land resource utilization in the past 300 years in China. A literature review focuses on the assumptions, methodologies and models of reconstructing historical land-use datasets while addresses accuracy evaluation issues. Historical population size, its growth rate, and the evolution of spatial-temporal patterns of farmland in China have also been discussed. Almost all available historical data about farmland such as historical documents, archives, taxation records, statistics and research outcomes have been collected to reconstruct the amount of historical farmland. With a few principles and assumptions, a delicate Cellular Automaton (CA) and Multi-Agents (MAS) model based on bottom-up management scheme has been applied to derive the spatial-temporal distribution of farmland with the 1km*1km grid resolution for the period between 1661 and 1980 in China. Suggestions for future studies related to reconstructing historical land-use changes are then provided.</p>
