Autore	Williams Marc
Titolo	Combatting Climate Change in the Pacific : The Role of Regional Organizations / / by Marc Williams, Duncan McDuie-Ra
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Palgrave Macmillan, , 2018
ISBN	9783319696478 3319696475
Edizione	[1st ed. 2018.]
Descrizione fisica	1 online resource (XIII, 136 p.)
Collana	Palgrave pivot
Disciplina	577.27
Soggetti	Ecology Climatology Physical geography Environmental monitoring Environmental Sciences Climate Sciences Physical Geography Environmental Monitoring
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	1. Introduction: The Politics of Climate Change in the Pacific -- 2. Organizing a Regional Response to Climate Change in the Pacific -- 3. Constructing Climate Change in the Pacific -- 4. Constructing Climate Security in the Pacific -- 5. Organizing Climate Finance in the Pacific -- 6. Conclusion: The Future of Climate Politics in the Pacific.
Sommario/riassunto	This book analyses the regional complexes of climate security in the Pacific. Pacific Island States and Territories (PICTs) have long been cast as the frontline of climate change and placed within the grand architecture of global climate governance. The region provides compelling new insights into the ways climate change is constructed, governed, and shaped by (and in turn shapes), regional and global climate politics. By focusing on climate security as it is constructed in the Pacific and how this concept mobilises resources and shapes the implementation of climate finance, the book provides an up-to-date

account of the way regional organizations in the Pacific have contributed to the search for solutions to the problem of climate insecurity. In the context of the United Nations Climate Change Conference (COP21) in Paris in 2015, the focus of this book on regional governance offers a concise and innovative account of climate politics in the prevailing global context and one with implications for the study of climate security in other regions, particularly in the developing world.
