

1. Record Nr.	UNINA9910299437703321
Autore	Chen Deliang
Titolo	European Trend Atlas of Extreme Temperature and Precipitation Records // by Deliang Chen, Alexander Walther, Anders Moberg, Phil Jones, Jucundus Jacobeit, David Lister
Pubbl/distr/stampa	Dordrecht : , : Springer Netherlands : , : Imprint : Springer, , 2015
ISBN	94-017-9312-3
Edizione	[1st ed. 2015.]
Descrizione fisica	1 online resource (183 p.)
Disciplina	55 551 551.5 551.6
Soggetti	Atmospheric science Climatology Natural disasters Atmospheric Sciences Natural Hazards
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Introduction -- Data and methods -- Atlas of the trend analysis -- Summary of the estimated trends -- Summary and conclusions -- Figures -- Tables -- References -- Appendix.
Sommario/riassunto	This Atlas presents records of climatic variability and change in Europe starting before 1901 and focuses especially on trends of extreme temperatures and precipitation. The authors have used software developed within EMULATE (European and North Atlantic daily to MULTidecadal climATE variability) to obtain the extremes indices and temporal trends. The trend atlas provides an easy way to identify spatial patterns for a given time period, region, season, and index. The Atlas clearly shows that climate in Europe has changed over the last 100 to 150 years, such that the occurrence and intensity of warm temperature extremes have increased. Precipitation extremes have also changed, but with a less clear pattern compared to the temperature extremes.
