

1. Record Nr.	UNINA9910299453103321
Titolo	Active Volcanoes of Chiapas (Mexico): El Chichón and Tacaná / / edited by Teresa Scolamacchia, José Luis Macías
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2015
ISBN	3-642-25890-5
Edizione	[1st ed. 2015.]
Descrizione fisica	1 online resource (186 p.)
Collana	Active Volcanoes of the World, , 2195-3589
Disciplina	551.21097275
Soggetti	Geology Natural disasters Geophysics Natural Hazards Geophysics/Geodesy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Foreword -- Geodynamic setting and pre-volcanic geology of active volcanism in Chiapas -- Petrology and geochemistry of El Chichón and Tacaná: two active, yet contrasting Mexican volcanoes -- El Chichón volcano: eruptive History -- Fluid geochemistry of El Chichón volcano-hydrothermal system -- Nature of the seismicity registered before and after the 1982 eruption -- Eruptive History of the Tacaná Volcanic Complex -- Fluid geochemistry of Tacaná volcano-hydrothermal system -- Risk management of El Chichón and Tacaná volcanoes: lessons learned from past volcanic crises -- Outlook.
Sommario/riassunto	This publication summarizes the studies carried out at two of the most active volcanoes of Chiapas (Mexico): El Chichón and Tacaná. El Chichón erupted explosively in 1982 killing more than 2000 people being the worst volcanic disaster in Mexico, and Tacaná produced two mild phreatic explosions in 1950 and 1986. Only after these explosions a surge of new studies began to unreveal their volcanic history and impact. This book presents the state of the art advances in topics related to the geologic setting of the two volcanoes, their eruptive history and composition of erupted products, the hydrothermal

systems and their manifestations. Volcanic hazards and risks and possible mitigation plans are discussed based on the experience of the catastrophic eruption of El Chichón that occurred in 1982. The book will also include previously unpublished material on the flora and the fauna of the region and archaeological and social aspects of the area that is inhabited by indigenous people.
