

1. Record Nr.	UNINA9910299454203321
Titolo	Green Logistics and Transportation : A Sustainable Supply Chain Perspective // edited by Behnam Fahimnia, Michael G.H. Bell, David A. Hensher, Joseph Sarkis
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2015
ISBN	3-319-17181-X
Edizione	[1st ed. 2015.]
Descrizione fisica	1 online resource (198 p.)
Collana	Greening of Industry Networks Studies, , 2543-0246 ; ; 4
Disciplina	330 333.7 338.927 388 658.5
Soggetti	Production management Transportation Environmental management Sustainable development Operations Management Environmental Management Sustainable Development
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di contenuto	1. The role of green logistics and transportation in sustainable supply chains -- 2. Behavioral influences on the environmental impact of collection/delivery points -- 3. Dynamic Supply Chain Greening Analysis -- 4. City logistics for sustainable and liveable cities -- 5. Green transport fleet appraisal -- 6. The inventory pollution-routing problem under uncertainty -- 7. Vehicle related innovations for improving the environmental performance of urban freight systems -- 8. Greening demand chains in urban passenger transport: emission savings from complex trip chains -- 9. A review of the literature of green ports and maritime logistics -- 10. Economic and environmental tradeoffs in water transportation -- 11. Economic and CO2 emission

performance in aviation: An empirical analysis of major European airlines -- 12. The future of green logistics and transportation.

Sommario/riassunto

This book identifies and furthers the state of the art in green logistics and transportation with a supply chain focus. It includes discussions on concerns and linkages across policy, corporate strategy and operations, and inter-organizational relationships and practices. Separate sections are assigned to discuss issues related to greening of logistics and transportation functions, including green logistics network, green land transportation, and green air and water transportation. Linking research with practice is another important feature of the book as various techniques and research methodologies are utilized to explain and analyze green logistics and transportation concepts and issues. The authors come from throughout the world from a variety of backgrounds (e.g. policy, technical, engineering, and management backgrounds) to provide solutions and insights from their regional and global perspectives to some of the world's most critical green logistics and transportation issues.
