

1. Record Nr.	UNINA9910299455803321
Autore	Rivera Fernando I
Titolo	Disaster vulnerability, hazards and resilience : perspectives from Florida // by Fernando I. Rivera, Naim Kapucu
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2015
ISBN	3-319-16453-8
Edizione	[1st ed. 2015.]
Descrizione fisica	1 online resource (218 p.)
Collana	Environmental Hazards, , 2542-9787
Disciplina	338.927 361 55 551
Soggetti	Natural disasters Sustainable development Social policy Natural Hazards Sustainable Development Social Policy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Chapter 1. Introduction -- Chapter 2. Emergency Management in Florida -- Chapter 3. Geography and Resilience -- Chapter 4. Hazards -- Chapter 5. Vulnerability -- Chapter 6. Resilience -- Chapter 7. The Path to Resilience -- Chapter 8. Communicating Resilience -- Chapter 9. Disaster Resilience in Rural Communities -- Chapter 10. Farmworkers in Resilience -- Chapter 11. Tourism and Resilience -- Chapter 12. Conclusion -- Chapter 13. Appendices A, B, C.
Sommario/riassunto	This monograph provides valuable lessons in building disaster resilience for rural communities and beyond. With a focus on Florida, the authors present a comprehensive review of the current debates surrounding the study of resilience, from federal frameworks, state plans and local initiatives. They also review evaluation tools and feature first-hand accounts of county emergency managers as well as non-

profit and community groups on key issues, including perspectives on vulnerable groups such as the elderly, children and farm workers. Readers will find insightful answers to such questions as: How can the concept of resilience be used as a framework to investigate the conditions that lead to stronger, more sustainable communities? What factors account for the variation across jurisdictions and geographic units in the ability to respond to and recover from a disaster? How does the recovery process impact the social, political and economic institutions of the stricken communities? How do communities, especially rural ones, collaborate with multiple stakeholders (local, regional, state, national) during the transition from recovery to resilience? Can the collaborative nature of disaster recovery help build resilient communities? The primary audiences of this book are scholars in emergency and crisis management, planning and policy, disaster response and recovery, disaster sociology and environmental management and policy. This book can also be used as a textbook in graduate and advanced undergraduate programs / courses on disaster management, disaster studies, emergency and crisis management, environmental policy and management and public policy and administration.
