Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	From the Contents: Foundations for Model-based Engineering of Systems of Systems -- Industrial Cyber-Physical Systems—iCyPhy -- SoS and Large-scale Complex Systems Architecting -- Policy Design: a New Area of Design Research and Practice -- A Virtual Web Net to Eco-Manage Food Packaging Waste -- Open Architecture for Naval CDS -- Application of an MBSE Approach for the Integration of Multidisciplinary Design.
Sommario/riassunto	This book contains all refereed papers that were accepted to the fourth edition of the « Complex Systems Design & Management » (CSD&M 2013) international conference which took place in Paris (France) from December 4-6, 2013. These proceedings cover the most recent trends in the emerging field of complex systems sciences & practices from an industrial and academic perspective, including the main industrial domains (transport, defense & security, electronics, energy & environment, e-services), scientific & technical topics (systems fundamentals, systems architecture & engineering, systems metrics & quality, systemic tools) and system types (transportation systems, embedded systems, software & information systems, systems of systems, artificial ecosystems). The CSD&M 2013 conference is organized under the guidance of the CESAMES non-profit organization.
