1. **Record Nr.** UNINA990001432930403321

   Titolo SET-VALUED mappings, selections and topological properties of 2 [superscript x] : proceedings of the conference held at the State University of New York at Buffalo, May 8-10, 1969 / Edited by W. M. Fleischman

   Pubbl/distr/stampa Berlin : Springer-Verlag, 1970

   ISBN 0-387-05293-3

   Descrizione fisica x, 109 p. ; 26 cm

   Collana Lecture Notes in Mathematics ; 171

   Disciplina 514.322

   Lingua di pubblicazione Inglese

   Formato Materiale a stampa

   Livello bibliografico Monografia

2. **Record Nr.** UNINA9910299479003321

   Titolo How nature works : complexity in interdisciplinary research and applications / / Ivan Zelinka ... [et. al.], editors

   Pubbl/distr/stampa Cham, : Springer International, 2014

   ISBN 3-319-00254-6

   Edizione [1st ed. 2014.]

   Descrizione fisica viii, 290 p

   Collana Emergence, complexity and computation ; ; 5

   Altri autori (Persone) ZelinkaIvan <1965->

   Disciplina 620

   Soggetti System theory
   Complexity (Philosophy)

   Lingua di pubblicazione Inglese

   Formato Materiale a stampa

   Livello bibliografico Monografia

   Note generali Bibliographic Level Mode of Issuance: Monograph

   Nota di bibliografia Includes bibliographical references.

   Nota di contenuto Complexity Decomplexified: A List of 200+ Results Encountered over 55 Years -- The Cause of Complexity in Nature: An Analytical and Computational Approach -- Complexity Fits the Fittest -- Rugged

Landscapes and Timescale Distributions in Complex Systems -- Structural Complexity of Vortex Flows by Diagram Analysis and Knot Polynomials -- Two Conceptual Models for Aspects of Complex Systems Behavior -- Toward a Computational Model of Complex Human Systems Dynamics -- Stochastic Complexity Analysis in Synthetic Biology -- Automatic Computation of Crossing Point Numbers within Orthogonal Interpolation Line-Graphs -- Computational Tactic to Retrieve a Complex Seismic Structure of the Hydrocarbon Model -- Controlling Complexity -- Influence of Chaotic Dynamics on the Performance of Differential Evolution Algorithm.

Sommario/riassunto	This book is based on the outcome of the "2012 Interdisciplinary Symposium on Complex Systems" held at the island of Kos. The book consists of 12 selected papers of the symposium starting with a comprehensive overview and classification of complexity problems, continuing by chapters about complexity, its observation, modeling and its applications to solving various problems including real-life applications. More exactly, readers will have an encounter with the structural complexity of vortex flows, the use of chaotic dynamics within evolutionary algorithms, complexity in synthetic biology, types of complexity hidden inside evolutionary dynamics and possible controlling methods, complexity of rugged landscapes, and more. All selected papers represent innovative ideas, philosophical overviews and state-of-the-art discussions on aspects of complexity. The book will be useful as instructional material for senior undergraduate and entry-level graduate students in computer science, physics, applied mathematics and engineering-type work in the area of complexity. The book will also be valuable as a resource of knowledge for practitioners who want to apply complexity to solve real-life problems in their own challenging applications. The authors and editors hope that readers will be inspired to do their own experiments and simulations, based on information reported in this book, thereby moving beyond the scope of the book.
