1.	Record Nr.	UNINA9910299479403321
	Titolo	Delay systems : from theory to numerics and applications / / Tomas Vyhlidal, Jean-Francois Lafay, Rifat Sipahi, editors
	Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , 2014
	ISBN	3-319-01695-4
	Edizione	[1st ed. 2014.]
	Descrizione fisica	1 online resource (xxiv, 404 pages) : illustrations (some color)
	Collana	Advances in Delays and Dynamics, , 2197-117X ; ; 1
	Disciplina	620
	Soggetti	Time delay systems
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	"ISSN: 2197-117X."
	Nota di bibliografia	Includes bibliographical references and index.
	Nota di contenuto	Part I Stability Analysis and Control Design -- Part II Networks and Graphs -- Part III Time-Delay and Sampled-Data Systems -- Part IV Computational and software tools -- Part V Applications.
	Sommario/riassunto	This volume is the first of the new series Advances in Dynamics and Delays. It offers the latest advances in the research of analyzing and controlling dynamical systems with delays, which arise in many real-world problems. The contributions in this series are a collection across various disciplines, encompassing engineering, physics, biology, and economics, and some are extensions of those presented at the IFAC (International Federation of Automatic Control) conferences since 2011. The series is categorized in five parts covering the main themes of the contributions: · Stability Analysis and Control Design · Networks and Graphs · Time Delay and Sampled-Data Systems · Computational and Software Tools · Applications This volume will become a good reference point for researchers and PhD students in the field of delay systems, and for those willing to learn more about the field, and it will also be a resource for control engineers, who will find innovative control methodologies for relevant applications, from both theory and numerical analysis perspectives.
