1. Record Nr.   UNINA9910299493503321

Titolo	The International Conference on Health Informatics : ICHI 2013, Vilamoura, Portugal on 7-9 November, 2013 / / edited by Yuan-Ting Zhang
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2014
ISBN	9783319030050
	3319030051
Edizione	[1st ed. 2014.]
Descrizione fisica	1 online resource (xv, 368 pages) : illustrations (some color)
Collana	IFMBE Proceedings, , 1433-9277 ; ; 42
Disciplina	502.85
	610.285
Soggetti	Biomedical engineering
	Medical informatics
	Telecommunication
	Biomedical Engineering and Bioengineering
	Health Informatics
	Communications Engineering, Networks
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"ISSN: 1680-0737."
	"ISSN: 1433-9277 (electronic)."
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Towards Unobtrusive and Wearable Blood Pressure Measurements -- Monitoring and Screening of Vulnerable Patients with Acute Cardiovascular Diseases -- Photo-acoustic Imaging and its Applications -- Tele-healthcare Systems and Applications -- Body Sensor Networks for Emerging Health Informatics -- Privacy and Network Security -- Emerging Technologies and Applications in Telemedicine -- Advanced Solutions for Supporting Cardiac Patients in Rehabilitation -- RFID & Wireless Sensors for Ubiquitous Healthcare & Internet-of-Things -- Public Health Informatics.
Sommario/riassunto	This volume presents the proceedings of the International Conference on Health Informatics (ICHI). The conference was a new special topic conference initiative by the International Federation of Medical and Biological Engineering (IFMBE), held in Vilamoura, Portugal on 7-9

November, 2013. The main theme of the ICHI2013 was "Integrating Information and Communication Technologies with Biomedicine for Global Health". The proceedings offer a unique forum to examine enabling technologies of sensors, devices and systems that optimize the acquisition, transmission, processing, storage, retrieval of biomedical and health information as well as to report novel clinical applications of health information systems and the deployment of m-Health, e-Health, u-Health, p-Health and Telemedicine.
