educationresearch in South Korea: History, development, and challenges -- Chapter 10 What it is like and what needs to be done: A status report on higher education in Macau and its research -- Chapter 11 The development and progress of higher education research in Taiwan: Massification matters -- Chapter 12 Higher education research in Mongolia during transition period of development -- Part III: South East Asia -- Chapter 13 Researching higher education in "Asia's global education hub": Major themes in Singapore -- Chapter 14 Higher education as field of study in Malaysia: Towards an epistemic community of Practice -- Chapter 15 higher education research in Thailand: Current trends and development -- Chapter 16 Higher education research in the Philippines: Policies and prospects -- Part IV: South/West Asia -- Chapter 17 Education research and emergence of higher education as a field of study in India -- Chapter 18 Higher education research in Iran: Quantitative development and qualitative challenges -- Chapter 19 The regeneration aspects for higher education research in the Kingdom of Saudi Arabia -- Part V: Conclusion -- Chapter 20 Higher education research in Asia: History, development and challenges.

Sommario/riassunto

This book discusses higher education research as a field of study in Asia. It traces the evolution of research in the field of higher education in several Asian countries, and shares ideas about the evolving higher education research communities in Asia. It also identifies common and dissimilar challenges across national communities, providing researchers and policymakers essential new insights into the relevance of a greater regional articulation of national higher education research communities, and their further integration into and contribution to the international higher education research community as a whole.
