Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Chapter 1. Introduction -- Chapter 2. Lessons learned and Janus Face of accident case study -- Chapter 3. Strict aversion to fatal incidents as a standard -- Chapter 4. Multiple fatality incidents on school and youth group camps and excursions – water-based activities: Lessons for prevention -- Chapter 5. School and youth group camp and excursion catastrophic events on land: Lessons for prevention -- Chapter 6. Single fatalities on school or youth group camps and excursions: Lessons for prevention from Australia and the UK -- Chapter 7. OE fatality prevention at an organisational level -- Chapter 8. Preventing fatal incidents.
Sommario/riassunto	This book approaches the prevention of fatal incidents in outdoor education and related fields through detailed study of past tragedies. Although safety in many fields is built on accumulated lessons from

past incidents, tragedies on school or youth group camps and excursions are so infrequent and so widely scattered that knowledge from previous incidents can elude those who would benefit.

Nevertheless, the emergence of unlearned lessons from the past weighs heavily when those affected by a tragedy judge whether an incident should have been prevented. This book provides a foundation for a detailed and comprehensive understanding of fatality prevention in outdoor education, and in youth camps and excursions. It compiles, examines, and analyses information on fatal incidents that have occurred over many decades, involving many kinds of groups and endeavours, from around the globe. No previous work has attempted this task.
