1. Record Nr.   UNINA9910299567703321

   Titolo   Advances in Computer and Computational Sciences : Proceedings of ICCCCS 2016, Volume 2 / / edited by Sanjiv K. Bhatia, Krishn K. Mishra, Shailesh Tiwari, Vivek Kumar Singh

   Pubbl/distr/stampa   Singapore : , : Springer Singapore : , : Imprint : Springer, , 2018

   ISBN   981-10-3773-6

   Edizione   [1st ed. 2018.]

   Descrizione fisica   1 online resource (XXIV, 713 p. 254 illus.)

   Collana   Advances in Intelligent Systems and Computing, , 2194-5357 ; ; 554

   Disciplina   004.015113

   Soggetti   Computational intelligence
                        Electrical engineering
                        Artificial intelligence
                        Computational Intelligence
                        Communications Engineering, Networks
                        Artificial Intelligence

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Nota di bibliografia   Includes bibliographical references at the end of each chapters and index.

   Nota di contenuto   Preface -- Technical Program Committee -- Table of Contents -- about the editors -- Chapters -- Author index.

   Sommario/riassunto   Exchange of information and innovative ideas are necessary to accelerate the development of technology. With advent of technology, intelligent and soft computing techniques came into existence with a wide scope of implementation in engineering sciences. Keeping this ideology in preference, this book includes the insights that reflect the 'Advances in Computer and Computational Sciences' from upcoming researchers and leading academicians across the globe. It contains high-quality peer-reviewed papers of 'International Conference on Computer, Communication and Computational Sciences (ICCCCS 2016), held during 12-13 August, 2016 in Ajmer, India'. These papers are arranged in the form of chapters. The content of the book is divided into two volumes that cover variety of topics such as intelligent hardware and software design, advanced communications, power and energy optimization, intelligent techniques used in internet of things,

intelligent image processing, advanced software engineering, evolutionary and soft computing, security and many more. This book helps the perspective readers' from computer industry and academia to derive the advances of next generation computer and communication technology and shape them into real life applications.
