Titolo	Business Continuity Management in Construction / / by Leni Sagita Riantini Supriadi, Low Sui Pheng
Pubbl/distr/stampa	Singapore : , : Springer Singapore : , : Imprint : Springer, , 2018
ISBN	981-10-5487-8
Edizione	[1st ed. 2018.]
Descrizione fisica	1 online resource (529 pages) : illustrations, tables
Collana	Management in the Built Environment, , 2522-0047
Disciplina	624.068
Soggetti	Building—Superintendence Construction industry—Management Building - Superintendence Operations research Decision making Sustainable development Construction Management Operations Research/Decision Theory Sustainable Development
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Introduction -- The Management of Crisis -- Business Continuity Management.-Organizational Culture and Institutional Forces -- Mainstream Theories: Implementation by Contractors -- The Indonesian Construction Industry -- Knowledge Based Decision Support System -- Conceptual Framework -- Research Design and Methodology -- Data Analysis: Surveys -- Data Analysis: Case Studies -- Data Analysis: BCM-KBDSS Development -- Findings and Discussion -- Conclusions and Recommendations.
Sommario/riassunto	This book provides an understanding of Business Continuity Management (BCM) implementation for local/international construction operations, with a primary focus on Indonesian construction firms as an illustrative example. It reviews the whole spectrum of work relating to organizational culture (OC) and the institutional framework (IF) as one of the key ways for companies to evaluate and implement BCM in

construction operations. Once readers have acquired a sound understanding of BCM, OC and IF linkages in construction firms, the lessons learned can be extended to other companies. This is facilitated through a systematic assessment framework presented in the book using a Knowledge Based Decision Support System (BCM-KBDSS), which allows these companies to evaluate their current status quo with respect to BCM, OC and IF, and then make informed decisions on how and to what extent BCM should be implemented in their operations. As such, the book offers a unique blend of theory and practice, ensuring readers gain a far better understanding of BCM implementation in the construction industry.
