

1. <b>Record Nr.</b>	UNINA9910299581703321
<b>Titolo</b>	Reliability and Statistics in Transportation and Communication : Selected Papers from the 17th International Conference on Reliability and Statistics in Transportation and Communication, RelStat'17, 18-21 October, 2017, Riga, Latvia // edited by Igor Kabashkin, Irina Yatskiv, Olegas Prentkovskis
<b>Pubbl/distr/stampa</b>	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2018
<b>ISBN</b>	3-319-74454-2
<b>Edizione</b>	[1st ed. 2018.]
<b>Descrizione fisica</b>	1 online resource (XV, 680 p. 211 illus.)
<b>Collana</b>	Lecture Notes in Networks and Systems, , 2367-3389 ; ; 36
<b>Disciplina</b>	380.5
<b>Soggetti</b>	Dynamics Nonlinear theories Statistics Telecommunication Transportation engineering Traffic engineering Applied Dynamical Systems Applied Statistics Communications Engineering, Networks Transportation Technology and Traffic Engineering
<b>Lingua di pubblicazione</b>	Inglese
<b>Formato</b>	Materiale a stampa
<b>Livello bibliografico</b>	Monografia
<b>Nota di bibliografia</b>	Includes bibliographical references at the end of each chapters and index.
<b>Sommario/riassunto</b>	This book reports on cutting-edge theories and methods for analyzing complex systems, such as transportation and communication networks and discusses multi-disciplinary approaches to dependability problems encountered when dealing with complex systems in practice. The book presents the most noteworthy methods and results discussed at the International Conference on Reliability and Statistics in Transportation and Communication (RelStat), which took place in Riga, Latvia on October 18 – 21, 2017. It spans a broad spectrum of topics, from

mathematical models and design methodologies, to software engineering and data security issues, as well as practical problems in technical systems, such as transportation, and telecommunications.
