

1. Record Nr.	UNINA9910299600203321
Titolo	Advances in Energy and Power Systems : Select Proceedings of ICAEDC 2017 // edited by Sri Niwas Singh, Fushuan Wen, Monika Jain
Pubbl/distr/stampa	Singapore : , : Springer Singapore : , : Imprint : Springer, , 2018
ISBN	978-981-13-0662-4 981-13-0662-1
Edizione	[1st ed. 2018.]
Descrizione fisica	1 online resource (XVI, 204 p. 108 illus., 65 illus. in color.)
Collana	Lecture Notes in Electrical Engineering, , 1876-1100 ; ; 508
Disciplina	621.042
Soggetti	Renewable energy resources Energy systems Power electronics Renewable and Green Energy Energy Systems Power Electronics, Electrical Machines and Networks
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Maximum Power Point Tracking approaches for Wind-Solar Hybrid Renewable Energy System: A Review -- Short Term PV Power Forecasting Using Generalized Neural Network and Weather Type Classification -- Model Order Reduction of Two Area Hydro Plant using Mixed Method -- Current Trends in Control Techniques in Renewable Energy: A Review -- Performance Analysis of PV Cell Using One-Diode and Two Diode Model -- Active Power Regulation by MPC based Flywheel Energy Storage System -- Post- evaluation Index System and Comprehensive Evaluation Method for Daily Power System Dispatching -- Real Assessment of State owned Indian Electric Utilities -- A Novel Scheme of Fault Detection in Power Transmission Line Using Image Processing -- Power Quality Improvement of Power Distribution System Under Symmetrical and Unsymmetrical Faults Using D-STATCOM -- Optimal sitting and sizing of capacitor using iterative search method for enhancement of Reliability of Distribution System -- Battery Energy Storage Technology Integrated For Power System Reliability Improvement -- Thermal Evaluation and Oxidation Stability of High

Temperature Alternative Solid Dielectrics of Power Transformers in Mixed Oil -- Multi-Area Economic Dispatch Using Dynamically Controlled Particle Swarm Optimization -- An Analytical Hierarchy Process based approach for Effective Maintenance Prioritization of Power Transformers -- Designing of Controllers using Chebyshev-Pole Clustering Approximants -- Comparison: Matrix Converter, Cycloconverter and DC Link Converter -- Power Quality Improvement and Analysis Using Multi-pulse Converters.

Sommario/riassunto

This book comprises select proceedings of the International Conference on Advancement in Energy, Drives, and Control. It covers pioneering topics in the field of renewable energy and power management, including energy storage, distribution, and control. It also discusses methods of optimizing power distribution and generation systems. This book is of use to researchers, professionals, and students from across engineering disciplines.
