

1. Record Nr.	UNINA9910299606003321
Titolo	Integrated Evaluation for the Management of Contemporary Cities : Results of SIEV 2016 // edited by Giulio Mondini, Enrico Fattinnanzi, Alessandra Oppio, Marta Bottero, Stefano Stanghellini
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2018
ISBN	3-319-78271-1
Edizione	[1st ed. 2018.]
Descrizione fisica	1 online resource (XXI, 629 p. 92 illus., 51 illus. in color.)
Collana	Green Energy and Technology, , 1865-3529
Disciplina	307.3416
Soggetti	Energy efficiency Urban geography Natural resources Energy Efficiency Urban Geography / Urbanism (inc. megacities, cities, towns) Natural Resource and Energy Economics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Human Ecology: Values and Paradigms -- Integral Ecology and Natural Resource Management -- Intergenerational Equity -- How to enhance dialogue and transparency into decision making processes.
Sommario/riassunto	This book highlights a selection of the best papers presented at the 2016 SIEV conference "The Laudato si Encyclical Letter and Valuation. Cities between Conflict and Solidarity, Decay and Regeneration, Exclusion and Participation", which was held in Rome, Italy, in April 2016, and brought together experts from a diverse range of fields – economics, appraisal, architecture, energy, urban planning, sociology, and the decision sciences – and government representatives. The book is divided into four parts: Human Ecology: Values and Paradigms; Integral Ecology and Natural Resource Management; Intergenerational Equity; and How to Enhance Dialogue and Transparency in Decision-making Processes. Cities are where 72% of all Europeans live, and this percentage is expected to rise to 80% by 2050. Given this trend towards urbanization, cities are continuously growing, which also

entails a growing risk of social segregation, lack of security and mounting environmental problems. All too often, today's cities have to cope with social and environmental crises, shifting the European urban agenda towards regeneration processes. Urban regeneration is more complex than merely renovating existing buildings, as it also involves social and environmental problems, inhabitants' quality of life, protecting tangible and intangible cultural resources, innovation and business. .
