Sommario/riassunto	Poverty and inequality have gained a new public presence in the United Kingdom. Literature, and particularly narrative literature, (re-) configures how people think, feel and behave in relation to poverty. This makes the analysis of poverty-themed fiction an important aspect in the new transdisciplinary field of poverty studies.

Sommario/riassunto	This book compares and contrasts the motivations, morality, and

effectiveness of space exploration when pursued by private entrepreneurs as opposed to government. The authors advocate market-driven, private initiatives take the lead through enhanced competition and significant resources that can be allocated to the exploration and exploitation of outer space. Space travel and colonisation is analysed through the prism of economic freedom and laissez faire capitalism, in a unique and accessible book.
