Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction: Sierra Leonean emotions, Sierra Leonean war -- Understanding Makeni and nested loyalties: marginality and collaboration in the northern capital -- "I must be grateful to them for freeing me": the soldier -- "They said nobody would hide from this war": the rebel -- "I held a gun but I did not fire it": the student -- The government brought death, the rebels allowed us to live": the trader -- "It was the Lord who wanted me to stay": the evangelist -- "They really damaged me": the father -- "The RUF thought I was on their side": the politician -- Epilogue and conclusions: Makeni, May 2010.
Sommario/riassunto	Utilizing narratives of seven different people-soldier, rebel, student, trader, evangelist, father, and politician-I Did it To Save My Life provides fresh insight into how ordinary Sierra Leoneans survived the war that devastated their country for a decade. Individuals in the town of Makeni narrate survival through the rubric of love, and by telling their stories and bringing memory into the present, create for themselves a powerful basis on which to reaffirm the rightness of their choices and orient themselves to a livable everyday. The book

illuminates a social world based on love, a deep, compassionate relationship based on material exchange and nurturing, that transcends romance and binds people together across space and through time. In situating their wartime lives firmly in this social world, they call into question the government's own narrative that Makeni residents openly collaborated with the rebel RUF during its three-year occupation of the town. Residents argue instead that it was the government's disloyalty to its people, rather than rebel invasion and occupation, which destroyed the town and forced uneasy co-existence between civilians and militants.

2. Record Nr.	UNINA9910299642203321
Titolo	Advances in Panel Data Analysis in Applied Economic Research : 2017 International Conference on Applied Economics (ICOAE) // edited by Nicholas Tsounis, Aspasia Vlachvei

Economic Growth -- Chapter 47: Does Financial Regulation influence bank efficiency? - A study on UAE banking sector -- Chapter 48: Competitiveness Index.

---

Sommario/riassunto

This proceedings volume presents new methods and applications in applied economic research with an emphasis on advances in panel data analysis. Featuring papers presented at the 2017 International Conference on Applied Economics (ICOAE) held at Coventry University, this volume provides current research on econometric panel data methodologies as they are applied in microeconomics, macroeconomics, financial economics and agricultural economics. International Conference on Applied Economics (ICOAE) is an annual conference that started in 2008 designed to bring together economists from different fields of applied economic research in order to share methods and ideas. Applied economics is a rapidly growing field of economics that combines economic theory with econometrics to analyse economic problems of the real world usually with economic policy interest. In addition, there is growing interest in the field for panel data estimation methods, tests and techniques. This volume makes a contribution in the field of applied economic research in this area. Featuring country specific studies, this book will be of interest to academics, students, researchers, practitioners, and policy makers in applied economics and economic policy.
