Nota di contenuto	Preface -- 1. Introduction -- 2. Tourism economic impacts -- 3. Tourism, a place-based activity -- 4. Tourism, a knowledge-based activity -- 5. Tourism dynamics and regional sustainable development -- 6. Spatial-economic impacts of tourism on regional development: contemporary challenges.
Sommario/riassunto	Welfare rise, spatial mobility, and global information and communication channels (in particular, social media) have prompted the emergence of a specific booming and rapidly growing mobility industry all over the world, namely tourism. The tourist sector (including recreation and leisure activities) has turned into a complex

contemporaneous socio-economic and geographic phenomenon, with a multiplicity of travel motives (e.g., entertainment, culture, relaxed life style, wellness, nature, etc.) and with a wide variety of impacts (e.g., urban- and regional-economic effects, crowding phenomena, environmental decay, etc.). Time has now come to offer a synthesis of the analytical apparatus in tourism research, with particular attention for system-wide, socio-economic and environmental dimensions of this important global industry. Tourism has in the past been a largely neglected field in regional science research. And therefore, it is laudable that João Romão has taken the decision to compose a systematically designed and well crafted monograph on the socio-economic, environmental and spatial dimensions of modern tourism. It offers a wealth of analytical insights and quantitative research tools for advanced tourism studies. It also fills an important gap in the current regional science literature. Peter Nijkamp, Tinbergen Institute, Amsterdam.
