ISBN	981-287-263-9
Edizione	[1st ed. 2015.]
Descrizione fisica	1 online resource (352 p.)
Disciplina	620 658.26 690.24 725-728
Soggetti	Building repair Buildings—Repair and reconstruction Energy efficiency Buildings Building Repair and Maintenance Energy Efficiency Building Types and Functions
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Overview -- An Overview of the Construction Industry -- Maintenance of Academic Buildings -- Malaysian Education System and University Buildings -- Building Maintenance Processes, Principles, Procedures, Practices and Strategies -- Methodological Issues -- Sustainability Maintenance Initiatives -- Conclusions and Recommendations.
Sommario/riassunto	This book is designed to be an inclusive for the best practice approach to building maintenance management, where the processes, procedures and operational systems meet a high standard of professional and academic competence. It offers a different perspective on building maintenance management by presenting the schematic building maintenance value chain model and it's implementation in Malaysian university buildings. The findings show an improvement to

building performance, lower maintenance cost, building sustainability and increased maintenance service user satisfaction. The learning outcomes and summaries provided for each chapter and the extensive use of tables and figures add to the readability of the text. Though the book is based on data from Malaysia, it is useful for a much wider audience, and the informal writing style makes it an interesting reference source. This book is valuable for readers who are practitioners, professionals and for academic institutions that offer courses in the building field, including architecture, quantity surveying, civil engineering, building and facility management, property management, real estate. It will also be of interest to governments and others involved in the construction industry. .
