1. Record Nr.   UNINA9910299681703321

   Autore   Xiang Yong

   Titolo   Blind Source Separation : Dependent Component Analysis / / by Yong
                        Xiang, Dezhong Peng, Zuyuan Yang

   Pubbl/distr/stampa   Singapore : , : Springer Singapore : , : Imprint : Springer, , 2015

   ISBN   981-287-227-2

   Edizione   [1st ed. 2015.]

   Descrizione fisica   1 online resource (101 p.)

   Collana   SpringerBriefs in Signal Processing, , 2196-4076

   Disciplina   620
                        621.3815
                        621.382

   Soggetti   Signal processing
                        Image processing
                        Speech processing systems
                        Electrical engineering
                        Electronic circuits
                        Signal, Image and Speech Processing
                        Communications Engineering, Networks
                        Circuits and Systems

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Note generali   Description based upon print version of record.

   Nota di bibliografia   Includes bibliographical references.

   Nota di contenuto   Introduction -- DCA Exploiting Nonnegativity -- DCA Utilizing Time-
                        Frequency Analysis (TFA) -- DCA Employing Precoding -- Summary and
                        Future Work.

   Sommario/riassunto   This book provides readers a complete and self-contained set of
                        knowledge about dependent source separation, including the latest
                        development in this field. The book gives an overview on blind source
                        separation where three promising blind separation techniques that can
                        tackle mutually correlated sources are presented. The book further
                        focuses on the non-negativity based methods, the time-frequency
                        analysis based methods, and the pre-coding based methods,
                        respectively.
