

1. Record Nr.	UNINA9910299724403321
Autore	Gupta Rajarshi
Titolo	ECG acquisition and automated remote processing // Rajarshi Gupta, Madhuchhanda Mitra, Jitendranath Bera
Pubbl/distr/stampa	New Delhi : , : Springer, , 2014
ISBN	81-322-1557-5
Edizione	[1st ed. 2014.]
Descrizione fisica	1 online resource (xvii, 131 pages) : illustrations (some color)
Collana	Gale eBooks
Disciplina	616.1207547 620
Soggetti	Electrocardiography - Data processing Medical telematics Biomedical engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Introduction -- ECG Signal Analysis -- ECG acquisition in a Computer -- ECG Transmission -- ECG Compression -- Challenges and Future Trends in Tele-health Services.
Sommario/riassunto	The book is focused on the area of remote processing of ECG in the context of telecardiology, an emerging area in the field of Biomedical Engineering Application. Considering the poor infrastructure and inadequate numbers of physicians in rural healthcare clinics in India and other developing nations, telemedicine services assume special importance. Telecardiology, a specialized area of telemedicine, is taken up in this book considering the importance of cardiac diseases, which is prevalent in the population under discussion. The main focus of this book is to discuss different aspects of ECG acquisition, its remote transmission and computerized ECG signal analysis for feature extraction. It also discusses ECG compression and application of standalone embedded systems, to develop a cost effective solution of a telecardiology system.
