

1. Record Nr.	UNINA9910299751403321
Autore	Adelman-Larsen Niels Werner
Titolo	Rock and Pop Venues [[electronic resource] ] : Acoustic and Architectural Design // by Niels Werner Adelman-Larsen
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2014
ISBN	3-642-45236-1
Edizione	[1st ed. 2014.]
Descrizione fisica	1 online resource (481 p.)
Disciplina	534 620 620.2 690
Soggetti	Acoustical engineering Buildings Acoustics Buildings—Design and construction Building Construction Engineering, Architectural Engineering Acoustics Building Types and Functions Building Construction and Design
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	History of Pop and Rock Sound -- Terms, Language -- The Gallery of Rock, Pop and Jazz Venues -- Acoustical Principles -- Assessment of Real Halls -- Design Principles -- The Acoustics during a Gig.
Sommario/riassunto	Popular music plays a substantial role in most people's life. The demand and financial revenue of Rock and Pop concerts is large and still increasing with the decreased revenue on recorded music. Based on the first ever scientific investigations on recommendable acoustics for amplified music conducted by the author, this book sets forward precise guidelines for acoustical engineers to optimize the acoustics in

existing or future halls for amplified music. Gives precise guidelines on how to design the acoustics in venues that present amplified music. Debates essential construction details, including placement of sound system and use of possible building materials, in the architectural design of new venues or the renovation of old ones. Portrays 75 well-known European Rock & Pop venues, their architecture and acoustic properties. 20 venues were rated for their acoustics by music professionals leading to an easy-to-use assessment methodology ” Acoustics are important within pop and rock venues to ensure a great experience for audiences and performers. This book fills an important gap of knowledge on the acoustics of venues. It will be of value to sound engineers as well as building owners and operators and building design professionals”. Rob Harris, Arup Acoustics ”With this book, many future amplified music concerts will sound better, for the joy of audiences and musicians alike. This enormous work demonstrates a rare degree of passion and insight, from the hand of the key researcher in the field”. Dr. Per V. Brüel.
