Nota di contenuto	Basics -- Basic Combinatorial Principles of Algebra -- Review of Elementary Group Properties -- Permutation Groups and Group Actions -- Normal Structure of Groups -- Generation in Groups -- Elementary Properties of Rings -- Elementary properties of Modules -- The Arithmetic of Integral Domains -- Principal Ideal Domains and Their Modules -- Theory of Fields -- Semiprime Rings -- Tensor Products.
Sommario/riassunto	<p>This book presents a graduate-level course on modern algebra. It can be used as a teaching book – owing to the copious exercises – and as a source book for those who wish to use the major theorems of algebra. The course begins with the basic combinatorial principles of algebra: posets, chain conditions, Galois connections, and dependence theories. Here, the general Jordan–Holder Theorem becomes a theorem on interval measures of certain lower semilattices. This is followed by basic courses on groups, rings and modules; the arithmetic of integral domains; fields; the categorical point of view; and tensor products. Beginning with introductory concepts and examples, each chapter proceeds gradually towards its more complex theorems. Proofs progress step-by-step from first principles. Many interesting results reside in the exercises, for example, the proof that ideals in a Dedekind domain are generated by at most two elements. The emphasis throughout is on real understanding as opposed to memorizing a catechism and so some chapters offer curiosity-driven appendices for the self-motivated student.</p>

Sommario/riassunto	This open access book offers a holistic and interdisciplinary analysis of the energy sector in the Middle East and North Africa (MENA) region

and its ongoing transformation. Taking into account global decarbonization policies, it offers a comprehensive overview of the transition's effects in the region highlighting socioeconomic, geopolitical and cultural aspects. The book is divided into four parts, the first of which illustrates the historical, cultural and socioeconomic heterogeneity of the MENA region. The second part assesses the region's energy sector, with a special focus on the energy mix and consumption evolution at the national level. The third part addresses the geopolitics and geoeconomics of the energy sector in MENA countries, including foreign interference, conflicts, investments and partnerships both related to hydrocarbons and energy transition. Lastly, the fourth part provides overall conclusions and key takeaways on all major aspects addressed by the book, highlighting various paths and strategies for decarbonization in the region.
