

1. Record Nr.	UNINA9910299847603321
Autore	Tollazzi Tomaž
Titolo	Alternative Types of Roundabouts : An Informational Guide / / by Tomaž Tollazzi
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2015
ISBN	3-319-09084-4
Edizione	[1st ed. 2015.]
Descrizione fisica	1 online resource (214 p.)
Collana	Springer Tracts on Transportation and Traffic, , 2194-8119 ; ; 6
Disciplina	625.725
Soggetti	Engineering geology Engineering—Geology Foundations Hydraulics City planning Regional planning Transportation Geoengineering, Foundations, Hydraulics Urbanism Landscape/Regional and Urban Planning
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Origins Of Roundabouts -- First Development Of Different Roundabout Types -- Modern Layout Design.- Recent Alternative Types Of Roundabouts -- Alternative types of roundabouts at development phases -- General criteria for calculating the capacities of alternative types of roundabouts -- Non-motorized participants on alternative types of roundabouts.- Possible Ways of Roundabouts' Development.
Sommario/riassunto	This book presents a history of roundabouts, an introduction to their design, calculations of their capacity and traffic-safety features. It describes the key features of standard roundabouts and their limitations. Alternative types of roundabouts are a fairly recent development and have only been implemented in a few countries to date. The book illustrates a broad variety of these recent alternative types of roundabouts, as well as proposed types still in the

development phase, explaining for each the specific needs it meets, its advantages and drawbacks. In closing, the book offers an outlook on the role of roundabouts in future street traffic.
