Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. [253]-256) and index.
Nota di contenuto	<p>Meta Analysis A Guide to Calibrating and Combining Statistical Evidence; Contents; Preface; Part I The Methods; 1 What can the reader expect from this book?; 1.1 A calibration scale for evidence; 1.1.1 T - values and p-values; 1.1.2 How generally applicable is the calibration scale?; 1.1.3 Combining evidence; 1.2 The efficacy of glass ionomer versus resin sealants for prevention of caries; 1.2.1 The data; 1.2.2 Analysis for individual studies; 1.2.3 Combining the evidence: fixed effects model; 1.2.4 Combining the evidence: random effects model; 1.3 Measures of effect size for two populations</p> <p>1.4 Summary2 Independent measurements with known precision; 2.1 Evidence for one-sided alternatives; 2.2 Evidence for two-sided alternatives; 2.3 Examples; 2.3.1 Filling containers; 2.3.2 Stability of blood samples; 2.3.3 Blood alcohol testing; 3 Independent measurements with unknown precision; 3.1 Effects and standardized effects; 3.2 Paired comparisons; 3.3 Examples; 3.3.1 Daily energy intake compared to a fixed level; 3.3.2 Darwin's data on Zea mays; 4 Comparing treatment to control; 4.1 Equal unknown precision; 4.2 Differing unknown precision; 4.3 Examples</p> <p>4.3.1 Drop in systolic blood pressure4.3.2 Effect of psychotherapy on hospital length of stay; 5 Comparing K treatments; 5.1 Methodology; 5.2 Examples; 5.2.1 Characteristics of antibiotics; 5.2.2 Red cell folate levels; 6 Evaluating risks; 6.1 Methodology; 6.2 Examples; 6.2.1 Ultrasound and left-handedness; 6.2.2 Treatment of recurrent urinary tract infections; 7 Comparing risks; 7.1 Methodology; 7.2 Examples; 7.2.1 Treatment of recurrent urinary tract infections; 7.2.2 Diuretics in pregnancy and risk of pre-eclampsia; 8 Evaluating Poisson rates; 8.1 Methodology; 8.2 Example</p> <p>8.2.1 Deaths by horse-kicks9 Comparing Poisson rates; 9.1 Methodology; 9.1.1 Unconditional evidence; 9.1.2 Conditional evidence; 9.2 Example; 9.2.1 Vaccination for the prevention of tuberculosis; 10 Goodness-of-fit testing; 10.1 Methodology; 10.2 Example; 10.2.1 Bellbirds arriving to feed nestlings; 11 Evidence for heterogeneity of effects and transformed effects; 11.1 Methodology; 11.1.1 Fixed effects; 11.1.2 Random effects; 11.2 Examples; 11.2.1 Deaths by horse-kicks; 11.2.2 Drop in systolic blood pressure; 11.2.3 Effect of psychotherapy on hospital length of stay</p> <p>11.2.4 Diuretics in pregnancy and risk of pre-eclampsia12 Combining evidence: fixed standardized effects model; 12.1 Methodology; 12.2 Examples; 12.2.1 Deaths by horse-kicks; 12.2.2 Drop in systolic blood pressure; 13 Combining evidence: random standardized effects model; 13.1 Methodology; 13.2 Example; 13.2.1 Diuretics in pregnancy and risk of pre-eclampsia; 14 Meta-regression; 14.1 Methodology; 14.2 Commonly encountered situations; 14.2.1 Standardized difference of means; 14.2.2 Difference in risk (two binomial proportions); 14.2.3 Log relative risk (two Poisson rates); 14.3 Examples</p> <p>14.3.1 Effect of open education on student creativity</p>
Sommario/riassunto	<p>Meta Analysis: A Guide to Calibrating and Combining Statistical Evidence acts as a source of basic methods for scientists wanting to combine evidence from different experiments. The authors aim to promote a deeper understanding of the notion of statistical evidence. The book is comprised of two parts - The Handbook, and The Theory. The Handbook is a guide for combining and interpreting experimental</p>

evidence to solve standard statistical problems. This section allows someone with a rudimentary knowledge in general statistics to apply the methods. The Theory

Nota di contenuto	Introduction -- Leadership in the Quest for Protection -- Breakthroughs in Universal Protection at the UN: Country Investigations, Thematic Investigations, Protection of Human Rights Defenders. Initiative for a High Commissioner -- Breakthroughs in Protection of the Vulnerable: Indigenous Peoples -- Voice for the Victims -- The Push for National Protection -- The Push for Regional Protection -- Human Rights Good Offices and Diplomacy -- Partnership for Protection -- Tackling the Root Causes as Well as the Symptoms of Violations -- A World Information Campaign for the Protection of Human Rights -- Overall Conclusion -- Afterword
Sommario/riassunto	This biography tells the story of Theo van Boven's dynamic and courageous leadership to develop UN protection. Van Boven has been a

life-long scholar and practitioner of human rights. He served in the Dutch Ministry of Foreign Affairs, represented The Netherlands in the UN Commission on Human Rights, served as an expert in its Sub-Commission on Human Rights, and also on the Committee on the Elimination of Racial Discrimination. He was the Director of the UN Human Rights secretariat from 1977 to 1982, and later served as Registrar of the International Criminal Tribunal for the Former Yugoslavia and for Rwanda, and as UN Special Rapporteur against Torture. As Director of the UN Human Rights secretariat, Professor van Boven built up the protection capacity of the United Nations piece by piece and thereby transformed the UN's role. He initiated every protection mechanism in use at the United Nations today. He was thus the father of the contemporary system of United Nations protection. This book is a priceless study of leadership and strategy. If one is to be able to deepen the protection capacity of the UN in the future, it is crucial to understand how the foundations were laid. This book, based on the personal papers of Professor van Boven and of the author, who was his Special Assistant, tells the story of his remarkable leadership of the UN Human Rights secretariat.
