Titolo	Dealing with debt and financial stress // edited by Justin Healey
Pubbl/distr/stampa	Thirroul, New South Wales : , : The Spinney Press, , 2018 ©2018
ISBN	1-925339-61-0
Descrizione fisica	1 online resource (60 pages) : colour illustrations
Collana	Issues in Society ; ; Volume 430
Disciplina	332.02402
Soggetti	Debt Finance, Personal Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Chapter 1. Financial stress and debt in Australia -- Chapter 2. Dealing with debt -- Chapter 3. Managing your money.
Sommario/riassunto	Many Australians are struggling to meet their payments for mortgages, investments, personal debt, student debt, and credit card debt. This is a helpful guide for young people to understand and avoid financial stress, with advice on how to deal with debt, manage money through budgeting and savings, and develop your financial literacy. Make the most of your money and manage debt.

Note generali	Description based upon print version of record.
Nota di contenuto	Book Cover; Title; Contents; Series editors' preface; Acknowledgement; Opening narrative; Technology as first practice; What ethics?; Preschools as loci of ethical practice; Towards a pedagogy of listening; Major and minor politics; The preschool as a site for democratic politics; In search of Utopia; References; Index
Sommario/riassunto	The early childhood services of Reggio Emilia in Northern Italy has gained worldwide interest and admiration. Drawing on the 'Reggio

approach', and others, this book explores the ethical and political dimensions of early childhood services and argues the importance of these dimensions at a time when they are often reduced to technical and managerial projects, without informed consideration for what is best for the child. Extending and developing the ideas raised in Beyond Quality in Early Childhood Care and Education the successful team of authors make a wide range of

Titolo	Advances in Intelligent Networking and Collaborative Systems : The 9th International Conference on Intelligent Networking and Collaborative Systems (INCoS-2017) // edited by Leonard Barolli, Isaac Woungang, Omar Khadeer Hussain
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2018
ISBN	3-319-65636-8
Edizione	[1st ed. 2018.]
Descrizione fisica	1 online resource (603 pages) : illustrations (some color), graphs, tables
Collana	Lecture Notes on Data Engineering and Communications Technologies, , 2367-4520 ; ; 8
Disciplina	004.6
Soggetti	Computational intelligence Artificial intelligence Big data Computational Intelligence Artificial Intelligence Big Data
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Sommario/riassunto	The aim of this book is to provide the latest research findings, innovative research results, methods and development techniques from both theoretical and practical perspectives related to intelligent social

networks and collaborative systems, intelligent networking systems, mobile collaborative systems, secure intelligent cloud systems, etc., and to reveal synergies among various paradigms in the multi-disciplinary field of intelligent collaborative systems. It presents the Proceedings of the 9th International Conference on Intelligent Networking and Collaborative Systems (INCoS-2017), held on August 24–26, 2017 in Toronto, Canada. With the rapid evolution of the Internet, we are currently experiencing a shift from the traditional sharing of information and applications as the main purpose of the Web to an emergent paradigm that puts people at the very centre of networks and exploits the value of people's connections, relations and collaborations. Social networks are also playing a major role in the dynamics and structure of intelligent Web-based networking and collaborative systems. Virtual campuses, virtual communities and organizations effectively leverage intelligent networking and collaborative systems by tapping into a broad range of formal and informal electronic relations, such as business-to-business, peer-to-peer and many types of online collaborative learning interactions, including the emerging e-learning systems. This has resulted in entangled systems that need to be managed efficiently and autonomously. In addition, the latest and powerful technologies based on Grid and wireless infrastructure as well as Cloud computing are now greatly enhancing collaborative and networking applications, but are also facing new issues and challenges. The principal objective of the research and development community is to stimulate research that leads to the creation of responsive environments for networking and, in the longer-term, the development of adaptive, secure, mobile, and intuitive intelligent systems for collaborative work and learning. .
