Autore	Nasr Michel R.
Titolo	Lymph Node Pathology for Clinicians / / by Michel R. Nasr, Anamarja M. Perry, Pamela Skrabek
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2019
ISBN	3-030-11515-1
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (217 pages)
Collana	Pathology for Clinicians, , 2570-3382
Disciplina	616.42
Soggetti	Pathology Cancer - Surgery Oncology Surgery Surgical Oncology General Surgery
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Introduction to Lymph Node Pathology -- Diagnostic Methods -- The Normal Lymph Node -- Benign Lymph Node Conditions -- Nomenclature and Classification of Lymphomas -- Precursor Lymphoid Neoplasms -- Mature B-cell Neoplasms -- Mature T- and NK-cell Neoplasms -- Hodgkin Lymphoma -- Immunodeficiency-associated Lymphoproliferative Disorders -- Granulocytic, Histiocytic and Dendritic Cell Neoplasms.
Sommario/riassunto	Lymph node pathology is a complex and rapidly evolving field that requires integration of morphologic findings with a number of ancillary studies, as well as clinical information, to diagnose neoplastic and non-neoplastic hematopoietic disorders. Lymphomas are currently classified according to the 2016 revision of the World Health Organization (WHO) Classification, which emphasizes, and for some diagnoses mandates, the integration of clinical information in diagnostic decision making. Successful collaboration and teamwork between pathology and clinical specialties, especially hematology/oncology, are paramount for excellent patient care. In addition to diagnosis, pathology plays a

significant role in lymphoma prognostication and contributes to patient management and follow-up. Lymph Node Pathology for Clinicians provides a concise overview of different entities in lymph node pathology with the primary audience being clinicians. This text is intended as a quick reference for a clinician to become familiar with pathologic aspects of lymphomas and the thought process of a pathologist. Particular consideration is given to relevant diagnostic and prognostic ancillary studies. Organized with an interdisciplinary approach for effective management of lymph node disorders, this book aims to educate our clinical colleagues on the most important aspects of lymph node pathology.

Detecting TV Program Highlight Scenes Using Twitter Data Classified by Twitter User Behavior -- BrainTranscending: A Hybrid Divergent Thinking Method that Exploits Creator Blind Spots -- Open Data

Integration for Lanna Cultural Heritage e-Museums -- An Expert System Using Ontology as Knowledge Base for Personalized Rice Cultivation Suggestion -- Designing a social innovation based knowledge support system: A preliminary guideline -- A Study of Cost, Revenue, and Profit Efficiency of Commercial Banks in Cambodia using DEA Approach -- Competition Boosts Innovativeness: the Case of CMS Evolution -- Modeling Traffic Accidents Occurrences Based on Land Use and Road Factors Using Geographically Weighted Regression Models -- A Model-based Method for Modeling and Verifying Event-Based Aspect-Oriented Applications -- A Retrospective on Constructing a Personal Narrative on Agile Development.

Sommario/riassunto

This book includes carefully selected papers presented at the 10th International Conference on Knowledge, Information and Creativity Support Systems (KICCS 2015), which was held in Phuket, Thailand, on November 12–14, 2015. Most of the papers are extended versions with the latest results added, representing virtually all topics covered by the conference. The KICCS 2015 focus theme, “Looking into the Future of Creativity and Decision Support Systems”, highlighted the field’s growing complexity and called for deeper, insightful discussions about the future, complemented with an exposition of current developments that have proven their value and usefulness. As such, the book addresses topics concerning future-oriented fields of research, such as anticipatory networks and systems; foresight support systems; and relevant newly emerging applications, exemplified by autonomous creative systems. It also focuses on cognitive and collaborative aspects of creativity.
