

1. Record Nr.	UNINA9910810033703321
Titolo	Blood and marrow transplantation long-term management : prevention and complications // edited by Bipin N. Savani
Pubbl/distr/stampa	Chichester, West Sussex, UK : , : John Wiley & Sons, , [2013] ©2013
ISBN	1-118-47334-5 1-118-47330-2 1-118-47337-X
Descrizione fisica	1 online resource (416 p.)
Altri autori (Persone)	SavaniBipin N
Disciplina	616.02/774
Soggetti	Hematopoietic stem cells - Transplantation Bone marrow - Transplantation Hematopoietic stem cells - Transplantation - Complications Bone marrow - Transplantation - Complications Long-term care of the sick
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	section 1. Late effects concepts -- section 2. Management -- section 3. Supportive care for long-term survivors after HSCT.
Sommario/riassunto	Currently more than 100,000 patients undergo blood and marrow transplantation (BMT) annually worldwide, a number which is steadily increasing. Long-term survival after BMT has improved significantly since its inception over 40 years ago, due to improved supportive care and early recognition of long-term complications. With broadening indications, more options for BMT, and improvement in survival, by 2020 there may be up to a million long-term survivors after BMT globally. Higher than average rates of second malignancies and cardiopulmonary, infectious, endocrine, and renal diseases, and bon

Autore	Renilson M (Martin)
Titolo	Submarine Hydrodynamics / / by Martin Renilson
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer , , 2018
ISBN	3-319-79057-9
Edizione	[2nd ed. 2018.]
Descrizione fisica	1 online resource (243 pages)
Disciplina	623.8257
Soggetti	Fluid mechanics Fluids Automatic control Engineering Fluid Dynamics Fluid- and Aerodynamics Control and Systems Theory
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	1 Introduction -- 2 Hydrostatics and Control -- 3 Manoeuvring and Control -- 4 Resistance and Flow -- 5 Propulsion -- 6 Appendage Design -- Hydro-Acoustic Performance.
Sommario/riassunto	This book covers specific aspects of submarine hydrodynamics in a very practical manner. The author reviews basic concepts of ship hydrodynamics and goes on to show how they are applied to submarines, including a look at the use of physical model experiments. The book is intended for professionals working in submarine hydrodynamics, as well as for advanced students in the field. This revised edition includes updated information on empirical methods for predicting the hydrodynamic manoeuvring coefficients, and for predicting the resistance of a submarine. It also includes new material on how to assess propulsors, and includes measures of wake distortion, which has a detrimental influence on propulsor performance. Additional information on safe manoeuvring envelopes is also provided. The wide range of references has been updated to include the latest material in the field. .
