1. Record Nr.   UNINA9910299950203321

   Titolo   Security with Intelligent Computing and Big-data Services / / edited by Sheng-Lung Peng, Shiuh-Jeng Wang, Valentina Emilia Balas, Ming Zhao

   Pubbl/distr/stampa Cham : , : Springer International Publishing : , : Imprint : Springer, , 2018

   ISBN   3-319-76451-9

   Edizione   [1st ed. 2018.]

   Descrizione fisica 1 online resource (377 pages)

   Collana   Advances in Intelligent Systems and Computing, , 2194-5365 ; ; 733

   Disciplina   005.8

   Soggetti   Computational intelligence
                       Artificial intelligence
                       Data protection
                       Computational Intelligence
                       Artificial Intelligence
                       Data and Information Security

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Nota di contenuto   A Social Tagging Recommendation Model Based on Improved Artificial Fish Swarm Algorithm and Tensor Decomposition -- Research on the Nearest Neighbor Representation Classification Algorithm in Feature Space -- Compact Cat Swarm Optimization Algorithm -- An Extension of Attack Trees -- History Management for Network Information of IoT Devices -- Strategies to Improve Auditing Performance and Soundness for Could Computation -- A Generic Web Application Testing and Attack Data Generation Method. .

   Sommario/riassunto In the dawning era of Intelligent Computing and Big-data Services, security issues will be an important consideration in promoting these new technologies into the future. This book presents the proceedings of the 2017 International Conference on Security with Intelligent Computing and Big-data Services, the Workshop on Information and Communication Security Science and Engineering, and the Workshop on Security in Forensics, Medical, and Computing Services and Applications. The topics addressed include: Algorithms and Security Analysis, Cryptanalysis and Detection Systems, IoT and E-commerce

Applications, Privacy and Cloud Computing, Information Hiding and Secret Sharing, Network Security and Applications, Digital Forensics and Mobile Systems, Public Key Systems and Data Processing, and Blockchain Applications in Technology. The conference is intended to promote healthy exchanges between researchers and industry practitioners regarding advances in the state of art of these security issues. The proceedings not only highlight novel and interesting ideas, but will also stimulate interesting discussions and inspire new research directions.
