

1. Record Nr.	UNINA9910299985703321
Autore	Murawski Roman
Titolo	The Philosophy of Mathematics and Logic in the 1920s and 1930s in Poland // by Roman Murawski
Pubbl/distr/stampa	Basel : , : Springer Basel : , : Imprint : Birkhäuser, , 2014
ISBN	3-0348-0831-3
Edizione	[1st ed. 2014.]
Descrizione fisica	1 online resource (235 p.)
Collana	Science Networks. Historical Studies, , 1421-6329 ; ; 48
Disciplina	510.904 511.30943809041
Soggetti	Mathematical logic Mathematics History Philosophy Logic Mathematical Logic and Foundations History of Mathematical Sciences History of Philosophy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction -- Predecessors -- The Polish School of Mathematics -- Lvov-Warsaw School of Philosophy -- Benedykt Bornstein -- Cracow Centre -- Conclusion -- Biographical Notes -- Bibliography -- Index of Names.
Sommario/riassunto	The aim of this book is to present and analyze philosophical conceptions concerning mathematics and logic as formulated by Polish logicians, mathematicians and philosophers in the 1920s and 1930s. It was a remarkable period in the history of Polish science, in particular in the history of Polish logic and mathematics. Therefore, it is justified to ask whether and to what extent the development of logic and mathematics was accompanied by a philosophical reflection. We try to answer those questions by analyzing both works of Polish logicians and mathematicians who have a philosophical temperament as well as their research practice. Works and philosophical views of the following Polish

scientists will be analyzed: Wacaw Sierpiski, Zygmunt Janiszewski, Stefan Mazurkiewicz, Stefan Banach Hugo Steinhaus, Eustachy ylsk and Leon Chwistek, Jan ukasiewicz, Zygmunt Zawirski, Stanisaw Leniewski, Tadeusz Kotarbiski, Kazimierz Ajdukiewicz, Alfred Tarski, Andrzej Mostowski and Henryk Mehlberg, Jan Sleszyski, Stanisaw Zaremba and Witold Wilkosz. To indicate the background of scientists being active in the 1920s and 1930s we consider in Chapter 1 some predecissors, in particular: Jan niadecki, Józef Maria Hoene-Wroski, Samuel Dickstein and Edward Stamm.
