|-------------------------|---|
| 1. Record Nr. | UNINA9910299991503321 |
| Titolo | Algebra, Geometry and Mathematical Physics [[electronic resource]] : AGMP, Mulhouse, France, October 2011 // edited by Abdenacer Makhlouf, Eugen Paal, Sergei D. Silvestrov, Alexander Stolin |
| Pubbl/distr/stampa | Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2014 |
| ISBN | 3-642-55361-3 |
| Edizione | [1st ed. 2014.] |
| Descrizione fisica | 1 online resource (680 p.) |
| Collana | Springer Proceedings in Mathematics & Statistics, , 2194-1009 ; ; 85 |
| Disciplina | 512.02 |
| Soggetti | Algebra Differential geometry Mathematical physics Nonassociative rings Rings (Algebra) Topological groups Lie groups Applied mathematics Engineering mathematics Differential Geometry Theoretical, Mathematical and Computational Physics Non-associative Rings and Algebras Topological Groups, Lie Groups Mathematical and Computational Engineering |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Note generali | Description based upon print version of record. |
| Nota di bibliografia | Includes bibliographical references at the end of each chapters and index. |
| Nota di contenuto | Part I Algebra -- Part II Geometry -- Part III Dynamical Symmetries and Conservation Laws -- Part IV Mathematical Physics and Applications. |
| Sommario/riassunto | This book collects the proceedings of the Algebra, Geometry and Mathematical Physics Conference, held at the University of Haute Alsace, France, October 2011. Organized in the four areas of algebra, geometry, dynamical symmetries and conservation laws and |

mathematical physics and applications, the book covers deformation theory and quantization; Hom-algebras and n-ary algebraic structures; Hopf algebra, integrable systems and related math structures; jet theory and Weil bundles; Lie theory and applications; non-commutative and Lie algebra and more. The papers explore the interplay between research in contemporary mathematics and physics concerned with generalizations of the main structures of Lie theory aimed at quantization, and discrete and non-commutative extensions of differential calculus and geometry, non-associative structures, actions of groups and semi-groups, non-commutative dynamics, non-commutative geometry and applications in physics and beyond. The book benefits a broad audience of researchers and advanced students.
