

1. Record Nr.	UNINA9910299992003321
Titolo	Descriptive topology and functional analysis : in honour of Jerzy Kakol's 60th birthday // edited by Juan Carlos Ferrando, Manuel López-Pellicer
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2014
ISBN	3-319-05224-1
Edizione	[1st ed. 2014.]
Descrizione fisica	1 online resource (247 p.)
Collana	Springer Proceedings in Mathematics & Statistics, , 2194-1009 ; ; 80
Disciplina	513.83
Soggetti	Functional analysis Topology Operator theory Measure theory Topological groups Lie groups Functional Analysis Operator Theory Measure and Integration Topological Groups, Lie Groups
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters.
Nota di contenuto	1 Some aspects in the Mathematical work of Jerzy Kakol -- 2 Weak barrelledness vs. P-spaces -- 3 On the topology of the sets of the real projections of the zeros of exponential polynomials -- 4 The density character of the space $C_p(X)$ -- 5 Compactness and distances to spaces of continuous functions and Fréchet spaces -- 6 Two classes of metrizable spaces l_c -invariant -- 7 Characteristics of the Mackey topology for abelian topological groups -- 8 Bowen's Entropy for Endomorphisms of Totally Bounded Abelian -- 9 On preserved and unpreserved extreme points Groups -- 10 Cantor sets, Bernoulli shifts and linear dynamics -- 11 Some non-linear geometrical properties of Banach spaces.
Sommario/riassunto	Descriptive topology and functional analysis, with extensive material demonstrating new connections between them, are the subject of the

first section of this work. Applications to spaces of continuous functions, topological Abelian groups, linear topological equivalence and to the separable quotient problem are included and are presented as open problems. The second section is devoted to Banach spaces, Banach algebras and operator theory. Each chapter presents a lot of worthwhile and important recent theorems with an abstract discussing the material in the chapter. Each chapter can almost be seen as a survey covering a particular area.
