Sommario/riassunto	This volume discusses, from an historical and literary angle, the ways in

which sanctification and the inscription of saintliness take place. Going beyond the traditional categories of canonization, cult, liturgical veneration and hagiographical lives, the work raises fundamental issues concerning definitions of saints and saintliness in a period before the concept was crystallized in canon law. As well as discussing sources and methodology, contributions cover contextual issues, including relics and veneration, life and the afterlife, and examinations of specific sources and texts. The book presents timely and needed contributions on privacy and data protection seals as seen from general, legal, policy, economic, technological, and societal perspectives. It covers data protection certification in the EU (i.e., the possibilities, actors and building blocks); the Schleswig-Holstein Data Protection Seal; the French Privacy Seal Scheme; privacy seals in the USA, Europe, Japan, Canada, India and Australia; controversies, challenges and lessons for privacy seals; the potential for privacy seals in emerging technologies; and an economic analysis. This book is particularly relevant in the EU context, given the General Data Protection Regulation (GDPR) impetus to data protection certification mechanisms and the dedication of specific provisions to certification. Its coverage of practices in jurisdictions outside the EU also makes it relevant globally. This book will appeal to European legislators and policy-makers, privacy and data protection practitioners, certification bodies, international organisations, and academics. Rowena Rodrigues is a Senior Research Analyst with Trilateral Research Ltd. in London and Vagelis Papakonstantinou is a Senior Researcher at the Vrije Universiteit Brussel in Brussels.
