Sommario/riassunto	This atlas, containing more than 300 color photos, focuses on those dermatologic conditions that are most common in ethnic skin or skin of

color. It includes succinct explanations of each disease process, describes clinical findings, and presents key information on diagnosis and treatment. Individual chapters are devoted to pigmentary disorders, follicular disorders, hair and scalp disorders, eczemas, papulosquamous disorders, granulomatous disorders, connective tissue diseases, infectious diseases, scarring disorders, cutaneous neoplasms, photodermatoses and drug eruptions. The fact that this atlas covers skin disorders that affect patients of all ethnic backgrounds ensures that it will be of worldwide relevance. It will serve as a valuable reference for dermatologists and a range of other health care providers.
