

1. Record Nr.	UNINA9910300067503321
Titolo	Nail Psoriasis : From A to Z // edited by Dimitris Rigopoulos, Antonella Tosti
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer , 2014
ISBN	3-319-08810-6
Edizione	[1st ed. 2014.]
Descrizione fisica	1 online resource (160 p.)
Disciplina	610 616.5 616723
Soggetti	Dermatology General practice (Medicine) Rheumatology General Practice / Family Medicine
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters.
Nota di contenuto	Epidemiology -- Genetics -- Arthritis and Comorbidities -- Pathology -- Diagnosis and newer Methods -- Clinical Features for Matrix, Bed, Folds -- Dermoscopy -- Differential Diagnosis -- Severity Evaluation Indexes -- Quality of Life -- Treatment -- Special Populations -- How to Choose my Treatment -- What is the Future?
Sommario/riassunto	Nail psoriasis is very common and causes considerable morbidity to patients. With the aid of informative illustrations, this book presents the clinical signs suggestive of nail psoriasis and describes the differential diagnosis of nail abnormalities. Newer methods of diagnosis are considered, and advice is provided on the use of severity evaluation indexes. The available treatments are extensively discussed, with information on the latest options. Selection of the appropriate treatment may be a challenge, so guidance is provided on all factors that should be taken into consideration and on choice of treatment for special categories of patient, such as children and pregnant women. Contributors have been selected from across the world, offering an international perspective on the condition. Nail Psoriasis will be an

invaluable up-to-date source of information for dermatologists and will also be of interest to rheumatologists and general practitioners, given that recognition of nail signs can lead to earlier diagnosis of arthropathic disease.
