

1. Record Nr.	UNINA9910300072103321
Titolo	Pathology of Melanocytic Nevi and Melanoma / / edited by Raymond L. Barnhill, Michael W. Piepkorn, Klaus J. Busam
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2014
ISBN	3-642-38385-8
Edizione	[3rd ed. 2014.]
Descrizione fisica	1 online resource (656 p.)
Disciplina	610 616.07 616.5 616.99
Soggetti	Pathology Dermatology Oncology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Melanocytes -- Biopsies, Tissue Processing, Immunohistochemistry, and Ancillary Techniques -- Genetic and Molecular Pathology of Melanoma -- Circumscribed Pigmented Lesions Composed of Basilar Melanocytes -- Common Acquired and Atypical (Dysplastic) Melanocytic Nevi -- Congenital Melanocytic Nevi and Associated Neoplasms, Congenital and Childhood Melanoma -- Spitz Nevus and Variants -- Dermal Melanocytoses, Blue Nevi, and Related Conditions -- Melanocytic Nevi with Phenotypic Heterogeneity -- Cutaneous Malignant Melanoma -- Benign and Malignant Melanocytic Neoplasms of the Mucosa -- Benign and Malignant Melanocytic Neoplasms of the Ocular Apparatus -- Metastatic Malignant Melanoma -- Prognostic Factors in Cutaneous Malignant Melanoma.
Sommario/riassunto	Highly acclaimed and considered the leading reference in the field, Pathology of Melanocytic Nevi and Melanoma has once again been fully revised, updated, and expanded to reflect the most recent advances and techniques in the field of melanoma pathology. New chapters on mucosal melanoma, ocular melanoma, and pigmented lesions of the

nail apparatus have been included in this new edition. The successful focus and format of the previous editions have been preserved. Each lesion and diagnosis is clearly illustrated with the aid of a wealth of digitally enhanced full-color photomicrographs. A concise description of the clinical features, histopathology, differential diagnosis, and outstanding characteristics of each lesion provides readers with a quick yet comprehensive overview of each topic covered. *Pathology of Melanocytic Nevi and Melanoma* is the essential reference for every practicing dermatopathologist, pathologist, dermatologist, and cancer research scientist today.
