

1. Record Nr.	UNINA9910300073403321
Titolo	Non Invasive Diagnostic Techniques in Clinical Dermatology [[electronic resource] /] / edited by Enzo Berardesca, Howard I. Maibach, Klaus-Peter Wilhelm
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2014
ISBN	3-642-32109-7
Edizione	[1st ed. 2014.]
Descrizione fisica	1 online resource (464 p.)
Disciplina	570.28 610 612 616.5
Soggetti	Dermatology Biology—Technique Human physiology Biological Techniques Human Physiology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Imaging Techniques -- Skin Analysis -- Superficial skin Analysis -- Water and Stratum Corneum Hydration -- Erythema and Blood Flow -- Hair and Follicles -- Nails.
Sommario/riassunto	This book is a comprehensive but compact guide to the latest technical and technological developments in the growing field of non invasive diagnosis in clinical dermatology. Information is provided on the practical and technical characteristics of a wide range of equipment and methods for in vivo measurements that aid in the investigation of skin function, the evaluation of topically applied products, and the monitoring of skin disease. Individual sections are devoted to imaging techniques, skin analysis, superficial skin analysis, skin mechanics, water and stratum corneum hydration, and erythema and blood flow. All of the authors are experts in the field, with detailed knowledge of the techniques they describe. Non Invasive Diagnostic Techniques in

Clinical Dermatology will be of value for all dermatologists, whether they are engaged in delivering patient care or in research programs, for cosmetic scientists, and for biologists involved in skin research and product assessment.
