

1. Record Nr.	UNINA9910300076603321
Titolo	Decentralizing Health Services : A Global Perspective // edited by Krishna Regmi
Pubbl/distr/stampa	New York, NY : , : Springer New York : , : Imprint : Springer, , 2014
ISBN	1-4614-9071-5
Edizione	[1st ed. 2014.]
Descrizione fisica	1 online resource (222 p.)
Disciplina	353.6 361 362.1 610
Soggetti	Public health Health administration Social policy Public Health Health Administration Social Policy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	""Foreword""; ""About the Editor""; ""Acknowledgements""; ""Contents""; ""Contributors""; ""Chapter 1: Health Service Decentralization: An Overview""; ""After Reading This Chapter, You Will Be Able to""; ""Introduction""; "" Why Decentralization""; "" Decentralization in Health""; "" Typology of Decentralization""; "" Opportunities and Challenges of Decentralization""; "" Success Factors of Decentralization""; "" Challenges""; "" Conclusion""; "" Further Discussion""; "" Recommended Reading""; ""References""; ""Chapter 2: Health Systems and Decentralization"" ""By the End of the Chapter, You Will Be Able to"" "" Introduction""; "" What Is a Health System?""; "" Why Do Health Systems Matter?""; ""Box 2.1 Importance of Health Systems""; "" Functions and Goals of the Health System""; ""Box 2.2 Health System Functions""; "" Health System Reform""; ""Activity 1""; "" Health Systems Reform and Decentralization""; ""Activity 2""; "" Conclusion""; "" Further Discussion"";

Sommario/riassunto

Decentralizing Health Services A Global Perspective Krishna Regmi, editor Current economic, demographic, and environmental shifts are presenting major challenges to health care systems around the world. In response, decentralization--the transfer of control from central to local authorities--is emerging as a successful means of meeting these challenges and reducing inequities of care. But as with health care itself, one size does not fit all, and care systems must be responsive to global reality as well as local demand. Decentralizing Health Services explores a variety of applications of decentralization to health care delivery in both the developing and developed worlds. Outfitted with principles, blueprints, and examples, this ambitious text clearly sets out the potential role of decentralized care as a major player in public health. Its models of service delivery illustrate care that is effective, inclusive, flexible, and in tune with the current era of preventive and evidence-based healthcare. Contributors point out opportunities, caveats, and controversies as they: Clarify the relationships among decentralization, politics, and policy Differentiate between political, fiscal, and administrative decentralization in health care systems Consider public/private partnerships in health systems Explain how the effects of decentralization can be evaluated. Present the newest data on the health outcomes of decentralization Explore some challenges and global issues of health systems in the 21st century And each chapter features learning goals, discussion questions, activities, and recommendations for further reading Heralding changes poised to revolutionize care, Decentralizing Health Services will broaden the horizons of researchers and administrators in health services, health economics, and health policy. .
