

1. Record Nr.	UNINA9910300082803321
Titolo	Orofacial Pain : A Clinician's Guide // edited by Nalini Vadivelu, Amarender Vadivelu, Alan David Kaye
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2014
ISBN	3-319-01875-2
Edizione	[1st ed. 2014.]
Descrizione fisica	1 online resource (188 p.)
Disciplina	610 616.0472 616.8 617.6
Soggetti	Pain medicine Dentistry Neurology Pain Medicine Neurology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	1. The Neurobiology of Orofacial Pain -- 2. Oral Health Related Quality of Life and Facial Pain -- 3. Classification and Epidemiology of Orofacial Pain -- 4. Nociceptive Chemical Mediators In Oral Inflammation -- 5. Dental Sleep Medicine and the Use of Oral Devices -- 6. Local Anesthesia in the Orofacial Region -- 7. Analgesics and adjuvants for the management of orofacial pain across age groups -- 8. Cognitive-Behavioral Therapy in Pain Management -- 9. Management of Oral Ulcers and Burning Mouth Syndrome -- 10. Hypnosis and Biofeedback for Orofacial Pain Management -- 11. Headaches, Migraine and Cluster Headache -- 12. Management of Orofacial Neuropathic Pain -- 13. Preemptive Analgesia and Multimodal Pain Management for Temporomandibular Total Joint Replacement Surgery.
Sommario/riassunto	This is a practical guide to the evidence-based diagnosis and

management of orofacial pain. It covers common clinical presentations of acute and chronic orofacial pain and summarizes clinically relevant neurobiology. Because diagnosing orofacial pain can be a challenge, the book describes the appropriate history-taking methods, detailed examinations, and relevant tests that will help clinicians to work through the differential diagnosis. Effective medical, surgical, and behavioral approaches are presented, and the importance of a multimodal approach is consistently emphasized throughout the book. The target audience includes pain physicians, anesthesiologists, dentists, neurologists, nurse practitioners, and physician's assistants. .
