

1. Record Nr.	UNINA9910300090503321
Autore	Cockerell Clay
Titolo	Dermatopathology : Clinicopathological Correlations // by Clay Cockerell, Martin C. Mihm Jr., Brian J. Hall, Cary Chisholm, Chad Jessup, Margaret Merola
Pubbl/distr/stampa	London : , : Springer London : , : Imprint : Springer, , 2014
ISBN	1-4471-5448-7
Edizione	[1st ed. 2014.]
Descrizione fisica	1 online resource (543 p.)
Disciplina	616.507
Soggetti	Dermatology Pathology Laboratory medicine Laboratory Medicine
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Interface (Lichenoid) Dermatitides -- Spongiotic Disorders -- Psoriasiform Dermatoses -- Vesiculobullous Diseases -- Large Vessel Vasculitis -- Connective Tissue Disorders -- Panniculitides -- Metabolic disorders -- Mucinoses -- Adnexal Diseases -- Alopecias -- Granulomatous Dermatitides -- Epidermal Maturation Diseases -- Reactions to Drugs -- Bacterial Infections -- Fungal infections -- Viral infections -- Arthropod Reactions/Parasites/Other -- Pediatric inflammatory disorders -- Benign melanocytic skin lesions -- Non-melanoma skin tumors -- Cysts Epithelial tumors -- Vascular anomalies -- Fibrohistiocytic Tumors -- Soft tissue tumors (Tumors of fat and muscle) -- Neural And Neuroendocrine Tumors -- Adnexal neoplasms -- General Guide to the Diagnosis of Cutaneous Malignant Hematopoietic Proliferations -- Pediatric tumors -- Metastases.
Sommario/riassunto	With significant progress as new techniques to evaluate the pathology of the skin, this book satisfies the need to provide practical clinical information and concise criteria for pathologic diagnosis for pathologists and dermatologists looking for an up-to-date resource. This superb visual reference provides detailed instruction of the experience of both diagnostic pathology and clinical dermatology.

Dermatopathology: Clinicopathological Correlations is a comprehensive but concise visual reference that contains specific features on the various clinical findings and histologic findings of skin diseases. It emphasizes criteria for diagnosis to help the trainee pathologist or dermatologist decipher the most important features and make clinical decisions quickly and effectively.
