

1. Record Nr.	UNINA9910300096503321
Autore	Derzelle Martine
Titolo	Towards a Psychosomatic Conception of Hypochondria : The Impeded Thought // by Martine Derzelle
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2014
ISBN	3-319-03053-1
Edizione	[1st ed. 2014.]
Descrizione fisica	1 online resource (126 p.)
Disciplina	150.195 150195 610 616
Soggetti	Psychiatry Psychotherapy Psychoanalysis Internal medicine Gastroenterology Pain medicine Psychotherapy Internal Medicine Gastroenterology Pain Medicine
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Questions -- Problems -- Problem Definition -- Negative Reports or "a Certain Discourse Used in a Certain Way" -- From Biological Body to Metaphorical Body -- A New Starting Point -- Hypochondria, Projective Parenthesis -- A Different Relation to Oneself and to the Other Person -- Towards a Psychosomatic Conception of Hypochondria.
Sommario/riassunto	A rigorous and groundbreaking study. Martine Derzelle is the first researcher to approach hypochondria as a relational pathology. Martine Derzelle is the first researcher to approach hypochondria as a relational pathology. The author tackles a subject that has puzzled care

professionals for decades: hypochondria. Martine Derzelle confronts all specialists (psychotherapists, psychiatrists, doctors, psychosomaticians) with the paradox of this pathology and the theoretical void on which the approach to those patients who express a suffering of various kinds has stood for more than a century. In the first part, the author highlights the lack of theoretical elaboration on hypochondria in the existent literature; in the second part, on the basis of clinical examples, she analyzes the nature of the disease, and then offers a completely innovative theoretical elaboration. Finally, in the third part, she proposes a new and specific approach to treating this pathology at both the theoretical and clinical levels within the framework of psychoanalysis and implementing key concepts from relational psychosomatics.
