

1. Record Nr.	UNINA9910300103803321
Titolo	Recent Advances in Mathematical and Statistical Methods : IV AMMCS International Conference, Waterloo, Canada, August 20–25, 2017 // edited by D. Marc Kilgour, Herb Kunze, Roman Makarov, Roderick Melnik, Xu Wang
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2018
ISBN	3-319-99719-X
Edizione	[1st ed. 2018.]
Descrizione fisica	1 online resource (622 pages)
Collana	Springer Proceedings in Mathematics & Statistics, , 2194-1009 ; ; 259
Disciplina	510
Soggetti	Computer mathematics Mathematical models Probabilities Biomathematics Mathematics Social sciences Statistics Computational Science and Engineering Mathematical Modeling and Industrial Mathematics Probability Theory and Stochastic Processes Mathematical and Computational Biology Mathematics in the Humanities and Social Sciences Statistics for Life Sciences, Medicine, Health Sciences
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Part I: Advances in Mathematical and Statistical Modelling -- Part II: Analytical and Computational Methods in Inverse Problems -- Part III: Computational Methods and Modelling in Engineering and Mechanics -- Part IV: Mathematical Modelling and Computation in Physical and Chemical Sciences -- Part V: Mathematical Modelling in Biological and Environmental Sciences -- Part VI: Mathematical Modelling in Medical and Health Sciences -- Part VII: Mathematics and Computation in

Sommario/riassunto

This book focuses on the recent development of methodologies and computation methods in mathematical and statistical modelling, computational science and applied mathematics. It emphasizes the development of theories and applications, and promotes interdisciplinary endeavour among mathematicians, statisticians, scientists, engineers and researchers from other disciplines. The book provides ideas, methods and tools in mathematical and statistical modelling that have been developed for a wide range of research fields, including medical, health sciences, biology, environmental science, engineering, physics and chemistry, finance, economics and social sciences. It presents original results addressing real-world problems. The contributions are products of a highly successful meeting held in August 2017 on the main campus of Wilfrid Laurier University, in Waterloo, Canada, the International Conference on Applied Mathematics, Modeling and Computational Science (AMMCS-2017). They make this book a valuable resource for readers interested not only in a broader overview of the methods, ideas and tools in mathematical and statistical approaches, but also in how they can attain valuable insights into problems arising in other disciplines.
