

1. Record Nr.	UNINA9910465315303321
Autore	Shenoy-Packer Suchitra
Titolo	India's working women and career discourses : society, socialization, and agency / / Suchitra Shenoy-Packer
Pubbl/distr/stampa	Lanham, Maryland ; ; London, England : , : Lexington Books, , 2014 ©2014
ISBN	0-7391-8478-4
Descrizione fisica	1 online resource (233 p.)
Disciplina	331.40954
Soggetti	Women - Employment - India Work and family - India Sex discrimination in employment - India Women - India - Social conditions Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Contents; Acknowledgments; 1 Introduction; 2 The Materiality of Social Discourses; 3 Family Socialization and Career Discourses; 4 Constrained Agency and Communion; 5 Meanings of Work and Career; 6 Conclusion; Appendix A: Research Methodology; Appendix B: Positionality and Field Research Experiences; Appendix C: Interview Guide; Appendix D: Profiles of Participants; References; Index; About the Author
Sommario/riassunto	This book examines Indian women's perception of their work and family lives at the intersection of postmodernity and tradition through the lenses of society, socialization, and agency. In interviews with seventy-seven women, this book demonstrates how India's daughters make personal and professional choices that privilege families over careers.

2. Record Nr.	UNINA9910300139903321
Autore	Alvo Mayer
Titolo	A Parametric Approach to Nonparametric Statistics // by Mayer Alvo, Philip L. H. Yu
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2018
ISBN	3-319-94153-4
Edizione	[1st ed. 2018.]
Descrizione fisica	1 online resource (XIV, 279 p. 15 illus. in color.)
Collana	Springer Series in the Data Sciences, , 2365-5682
Disciplina	519.54
Soggetti	Probabilities Statistics Probability Theory Statistical Theory and Methods
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	I. Introduction and Fundamentals -- Introduction -- Fundamental Concepts in Parametric Inference -- II. Modern Nonparametric Statistical Methods -- Smooth Goodness of Fit Tests -- One-Sample and Two-Sample Problems -- Multi-Sample Problems -- Tests for Trend and Association -- Optimal Rank Tests -- Efficiency -- III. Selected Applications -- Multiple Change-Point Problems -- Bayesian Models for Ranking Data -- Analysis of Censored Data -- A. Description of Data Sets.
Sommario/riassunto	This book demonstrates that nonparametric statistics can be taught from a parametric point of view. As a result, one can exploit various parametric tools such as the use of the likelihood function, penalized likelihood and score functions to not only derive well-known tests but to also go beyond and make use of Bayesian methods to analyze ranking data. The book bridges the gap between parametric and nonparametric statistics and presents the best practices of the former while enjoying the robustness properties of the latter. This book can be used in a graduate course in nonparametrics, with parts being accessible to senior undergraduates. In addition, the book will be of wide interest to statisticians and researchers in applied fields.
